STANDARD OPERATING PROCEDURE (SOP) FOR FAST AND SLOW LEARNERS

1. Objective

The objective of this Standard Operating Procedure (SOP) is to establish a structured and systematic mechanism for identifying students based on their academic performance and providing appropriate academic support and motivation. The SOP aims to improve the learning outcomes of students who require additional academic assistance through timely interventions, while also encouraging and recognizing students who demonstrate high academic performance, thereby fostering an inclusive and supportive learning environment.

2. Scope

This SOP is applicable to all students enrolled in the academic programs of the institution across all departments and terms. It involves the coordinated participation of faculty members, mentors, and academic administration to ensure uniform implementation of academic support and performance enhancement measures.

3. Purpose

The purpose of this SOP is to ensure early identification of students requiring academic support, improve the academic performance of slow learners through structured tutorial and mentoring activities, and motivate fast learners through recognition and encouragement. The procedure seeks to promote continuous academic improvement and overall student development.

5. Procedure

The identification of slow and fast learners is carried out in a systematic manner at different stages of the academic program. In the first term, students are identified based on their performance in the qualifying or previous examination. Students who have secured less than 60% marks are categorized as slow learners. These students are provided with additional tutorial classes and academic support to strengthen their fundamental concepts and ease their transition into the academic program.

From the second term onwards, students are identified based on their term-wise academic performance measured through the Term-wise Grade Point Average (TGPA). Students securing a TGPA below 4.0 are identified as slow learners, while students securing a TGPA above 6.0 are identified as fast learners. Students with TGPA between 4.0 and 6.0 are considered average learners and continue with regular academic activities without additional intervention. In addition to TGPA, faculty members may also consider classroom participation, attendance, and overall engagement as supporting indicators.

GNIoT INSTITUTE OF MANAGEMENT STUDIES (GIMS)

NIOT Institute of Management Studies
Plot No.-7, Knowledge Park
Uttar Pradesh

Step 1: Identification Criteria

Category	CGPA Range	Description
Slow Learners	TGPA < 4.0	Students requiring additional academic support, counselling, and motivation to achieve satisfactory performance.
Average Learner	$4.0 \leq \text{TGPA} \leq 6.0$	No specific intervention or additional support is required as they are performing at an acceptable academic level.
Fast Learners	TGPA > 6.0	Students who consistently perform well, show strong analytical ability, and display leadership or research aptitude.

Step 2: Action Plan for Each Category

A. Slow Learners (TGPA < 4.0)

1. Conduct tutorial classes for subjects and foundational concepts.
2. Offer counselling.

B. Fast Learners (TGPA > 6.0)

- Appreciation and recognition awards

Step 3: Monitoring and Evaluation

- Students' performance will be monitored regularly in class by the faculty.
- Students showing improvement may be reclassified in the following trimester based on updated TGPA.

6. Monitoring and Evaluation

The academic progress of both slow and fast learners is monitored regularly by faculty members and mentors. Performance reviews are conducted at the end of each term, and students may be reclassified based on their updated TGPA. The effectiveness of tutorial classes and mentoring activities is reviewed periodically to ensure continuous academic improvement.

7. Documentation

All records related to the identification and support of slow and fast learners are systematically maintained. These include student performance records, TGPA lists, tutorial class schedules and attendance and progress monitoring documents. These records serve as evidence of implementation and are used for internal review and quality assurance purposes.
