Corporate Finance

Course Code	DM 203
Course Credit	3
Term	II
Session duration	60 mins each session

Introduction

Corporate Finance is a field of study that helps to apply finance concepts and principles to decision-making in management. It empowers management with a framework for analysing and comprehending the financial environment in which their organisations operate to maximise the firm's value through intelligent decision-making. It inculcates managerial decision-making skills in the students that help them to analyze, evaluate and consider the financial implications of their choices. The course is designed to meet the **applied level of Bloom's taxonomy at specific points, but largely it is designed to meet the level of understanding and application of the taxonomy.**

Programme Outcome

After obtaining the PGDM Degree, A student should be able to

PO1	Understand the Fundamentals of all functional areas of management.
PO2	Apply the management knowledge to make better decisions for various given business scenarios.
PO3	Critically analyze business problems and find the right management tool to solve them.
PO4	Demonstrate values, ethics, leadership and teamwork.
PO5	Higher employability quotient

Course Outcome

After enrolling in the PGDM, A student shall be able to learn.

CO1	Basic concepts and principles of corporate finance.
CO2	It helps to make informed business decisions and develop effective financial strategies.
CO3	To be equipped with analytical tools and framework to make decisions in complex and challenging financial environments regarding the cost and financial structure of the Company.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice regularly to augment classroom learning. Students will also be given the video lecture links of the teaching faculty to clear their doubts after the classroom.

Cheating is strictly prohibited at GIMS and will invite penalties as per the policies of the Institute.

Operation Management

Course Code	DM-204
Course Credits	1.5
Term	II
Session duration	60 mins each session

Introduction:

The aim of this course is to develop the understanding of the strategic and operational issues in the operational/ manufacturing environment of any organization and the various decisions involved the operational activities and the methods by which best possible alternative decision can be taken.

Programme Outcomes

After completing PGDM a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate values, ethics, leadership and teamwork.
PO5	Higher employability quotient

Course Outcomes:

After taking this course a student shall be able to;

CO1	Understand the fundamental, practical science of Operations Management
CO2	Examine how these principles operations management can be employed in both tactical and strategic decision making in firms.
CO3	Develop ability to analyze and address problem related to the design, planning, control, and improvements of manufacturing and service operations.
CO4	Understand the basic of Supply Chain Management.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning.

Text Books:

1. Operations Management Theory and Practices , B Mahadevan

5. Production and Operation management , kanishka Bedi , Oxford higher Education
6. Supply Chain Management, 6/e Sixth Edition, Sunil Chopra, Peter Meindl

Curriculum**Unit-1 Introduction to Operations Management:**

Introduction to Operations Management: Definition, need, responsibilities, key decisions of Operation Manager. Production vs Operations Management. Operations as a key functional area in an organization. Transformation process, Input transformed and transforming resources in service and manufacturing units, Using Operations as a competitive advantage.

Unit-2 Strategic Decisions in Operations Management:

Operation Strategies-Definition, relevance, strategy formulation process, order qualifying and order winning attribute. Process Selection: Definition, Characteristics that influence the choice of alternative processes (volume and variety), type of processes- job shop, batch, mass and continuous, product- process design Matrix and Services design matrix, technology issues in process design, flexible manufacturing systems (FMS), and computer integrated manufacturing (CIM). Layout Decision: Layout planning – Benefits of good layout, importance, different types of layouts (Process, Product, Group technology and Fixed position layout). Assembly line balancing by using LOT rule; Location Decisions & Models: Facility Location – Objective, factors that influence location decision. Capacity Planning: Definition, measures of capacity (input and output), types of planning over time horizon..

Unit-3 Planning and Operational Decisions in Operations Management:

Lean production: Definition of lean production, lean Demand-Pull logic, waste in operations, elements that address elimination of waste. 2 card Kanban Production Control system. Planning Production Schedules, Aggregate Planning and Master Production Scheduling, Inventory Planning, Materials and Capacity Requirement Planning, JIT Manufacturing, Planning and Scheduling, Services Operations. TQM.

Unit-4 Supply Chain Management:

Introduction to SCM, Components and essentials of SCM.

Academic integrity

Plagiarism is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable in GIMS and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.

Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

Basic Python for Managers

Course Code	DM-205
Course Credit	3
Term	II
Session duration	60 mins each session

Introduction

This Course offers a wide range of opportunities for students to explore and apply their programming skills in diverse fields. Its versatility, ease of learning, and extensive community support make it an excellent choice for teaching students about programming and its real-world applications. Python is a beginner-friendly language that provides a solid foundation for programming and problem-solving. It equips students with valuable skills and knowledge that can be applied in various academic and professional fields. The course is structured to meet the **apply level of bloom's taxonomy at certain points but largely it is designed to meet the level of understanding level of the Programming language.**

Programme Outcomes

After completing PGDM a student should be able to;

PO1	Understand fundamentals of all functional areas of management.
PO2	Apply the management knowledge to take better decisions for various given business scenarios.
PO3	Critically understand the business problems and find right management tool to solve them.
PO4	Demonstrate values, ethics, leadership and teamwork.
PO5	Higher employability quotient.

Course Outcomes

After taking this course a student shall be able to;

CO1	Python, including installation, basic syntax, variables, data types, operators, and type conversion, enabling them to write basic Python programs.
CO2	Proficient in designing and implementing control flow structures and functions in Python to solve complex problems.

CO3	Select and apply appropriate data structures in Python, optimizing data organization and manipulation for various computational tasks.
CO4	Manage files and handling exceptions in Python, ensuring efficient data storage and robust error handling in their programs.
CO 5	Effectively manage and analyse data for informed decision-making and reporting.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom (if required).

Curriculum

Unit-1 Introduction to Python

What is Python and why it's Popular, Installing Python and a Code editor, Features of Python, Basic syntax, Print statements, and Comments, Variables, data types, operators and type conversion.

Unit-2 Data Structure

Lists: (Creating, indexing, slicing and modifying). Tuples: (Creating, indexing and immutability), Dictionaries: Creating, adding, and accessing elements. Sets. Arrays.

Unit-3 Control Structure and Functions

Conditional Statements, Loops(for and while) and their applications, Defining and calling functions, parameters and return values, Lambda Function.

Unit-4 File Handling and Exception Handling

Reading and writing files(TEXT/CSV/JSON), Handling common file-related errors, Introduction to exceptions and try-except blocks.

Unit-5 Introduction to libraries & Data

Pandas for data manipulation, Data visualization with matplotlib or Seaborn, Tabulation using python, Descriptive data analysis.

Academic integrity

a. **Plagiarism** is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable in GIMS and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.

Cheating means using written, verbal or electronic sources of aid during an examination/ quiz/ assignment or providing such assistance to other students (except in cases where it is expressly permitted by the faculty). It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

Quantitative Techniques

Course Code	DM 206
Course Credits	3
Term	II
Session duration	60 mins each session

Introduction

Business decisions and forecasting in all domains of management is driven by data and data analysis tools. Quantitative techniques is a course that enables the aspirant to use contemporary data based decision making techniques. This course become highly important for the students who are willing to pursue their career in the field(s) of business analytics, data analytics etc. The course is structured to meet apply level of bloom's taxonomy.

Programme Outcomes

After completing PGDM a student should be able to:

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understand the fundamentals of quantitative techniques and its interdisciplinary role in decision making
CO2	Identify the right models for solving the particular problem
CO3	Apply the models for decision making and forecasting.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Advance Excel for Managers

Course Code	DM-208
Course Credits	1.5
Course for	PGDM
Term	II
Session duration	60 mins each session

Introduction

Excel is a great resource for teaching students many important skills, like data visualization, data organization and information restructuring, filtration, quick calculations, data interpretation and tabulation, etc. All of these skills are important for the future. Microsoft Excel (MS Excel) helps worldwide users to work on a spreadsheet on their computers. It's a versatile application that makes data gathering, tabulation, and recording jobs easier.

Excel is commonly used for data organization, accounting, and progress report processes. It's used in all business functions in whatever size and category. It's also a necessary tool across all sectors and industries. Even the education sector finds it very useful in its records management and educational templates.

Programme Outcomes

After completing PGDM a student should be able to:

PO1	Understand fundamentals of all functional areas of management.
PO2	Apply the management knowledge to take better decisions for various given business scenarios.
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate values, ethics, leadership and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to:

CO1	Improved time management: increase productivity and improve time management by having a command on various features of Excel.
CO2	Utilizing excel concepts and knowledge, and be able to tackle even the more complex calculations and operations with inbuilt tools, without wasting too much time, and without compromising even a bit on accuracy.
CO3	Having enough analytical skills to make sense of the finances and other important metrics. Equipping with necessary knowledge and skills to perform well in their professional careers as well. Supporting building strong analytical skills by managing, analyzing, and performing business and daily life financial calculations.
CO4	Displaying Data in an easily-consumable pictorial format with the various visualization methods of Excel. Focusing on faster and more accurate decision making, quick calculations, seamless data visualization, and a lot more

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be provided with the important video links available on free source of some topics for further doubt clarifications.

Text Book

1. Excel 2019 ALL-IN-ONE for Dummies.
2. Excel: Quickstart Guide from Beginner to Expert.

Reference Books:

Curriculum

Unit-1 Working with Large Worksheets

1. Viewing and Organizing Spreadsheet Data
 - a. The Zoom Feature
2. Using Freeze Panes
3. Hide rows and columns
4. Using Automatic Outlining – Group & ungroup
 - a. Grouping Data Manually
5. Cell Formatting
6. Data validation

Working with Dates

1. Dates and time in Excel
2. Inserting and formatting dates.
3. Entering date functions
4. Using dates in formulas
5. Function: Excel's Important DATE Functions

Conditional Formulas and Formatting

1. The IF function
2. Using the Function Library
 - a. Manually entering a function
3. Conditional Formatting
 - a. Applying Conditional Formatting
 - b. Creating a Conditional Formatting Rule
 - c. Removing Conditional Formatting
 - d. Using the Manage Rules Option

Unit-2 Working with Tables

1. What is a Table?
2. Creating Tables
3. Changing the Table Range
4. Inserting Table Columns
5. Inserting Table Rows
6. Deleting Rows or Columns
7. Creating a Table Total Row

Sorting and Filtering Tables

1. Sorting Data in a Table
2. What is an AutoFilter?
3. Custom AutoFilters
4. Removing Filters
5. Filtering with Wildcard Characters
6. Using an Advanced Filter
7. Creating Subtotals

Unit-3

Function #1: SUMIFS & COUNTIFS

Function #2: IF - Nested Functions

Function #3: IFERROR

Function #4: VLOOKUP & HLOOKUP for Dynamic Lookups

Function #5: INDEX & MATCH for Flexible Lookups

Unit-4

Function #6: The Most Useful Text Functions

Function #8: OFFSET for Dynamic Calculations

Function #9: FREQUENCY, SMALL & LARGE

Function #10: SUMPRODUCT

Unit-5 Analyst & Auditor Skills

1. Pivot Tables
2. Charts in excel
3. What if Analysis (Goal seek, Scenarios)
4. Import and Export data
5. Dashboard in excel
6. Protection of Cells, Sheets, and Workbook

Academic integrity

Business Research Methods

Course Code	DM-303
Course Credit	3
Course	PGDM
Term	III

Introduction

Business Research Methods is an important area of study for management graduates. The course hones the aspirants' research-based decision-making skills. The course provides learning in qualitative and quantitative research methods. The industry scope of the course is very high as business decisions in contemporary time are research and analysis driven. Apart from business decisions the course provides a great understanding of data analysis and experiment design that leads to the testing of innovative ideas.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understand the research methods for all functional areas of management
CO2	Design the experiments for management research
CO3	Analyse the output of experiments for effective decision making

Pedagogy

The course will be based on Classroom lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning.

Course Evaluation

The evaluation process for the course would constitute of the following:

Component	Weightage	Session	COs Mapped
Group Presentation	10%	Session 8,9&10	3
Case Study (1)	10%	Session 14 & 15	2
Quiz (Best 1 of 2)	10%	Session 4, 13	1,2
Field Assignment	10%	Session 5,6	2,4
Final term Examination	60%	1.5 hours as per schedule	1, 2, 4

Group Presentation(s): The students will be given the discussed topic for the presentation. Students are expected to present their content in an effective manner and are clearly able to answer the questions asked during presentation.

Following structure of the presentation to be followed:

1. The presentation to be designed either on MS PowerPoint, Canva or any other digital tool available with the students.
2. There should a maximum 12 slides in the ppt.
3. The presentation to be crisp in content.
4. The presentation must be the original work of the students.
5. Each member of the group will design and deliver their part in the presentation.

Field Assignment: The students will have to work on a field assignment in a group of maximum 7 members. They will be provided a hypothetical business scenario in the area of corporate communication and they will have to take up the problem in any of the corporates available in the vicinity, collect data, analyze the problem and the solution too and provide a comprehensive communication plan.

Following structure for assignment shall be followed:

1. The analysis should be done on the basis of the concepts discussed in the class

2. The case for the project will be assigned in the 5th class.
3. The groups will have to submit a report by the 15th class.
4. The report should be prepared as per the following guidelines:
 - a. Introduction
 - b. Problem Statement
 - c. Analysis and Interpretation
 - d. Solution to problem
1. Cover page with the name of the student, roll number of the student, topic of the assignment, date of submission and name of the faculty.
1. Each topic covered shall have a clear understanding of mentioned content.

Quiz: Quiz will be composed of 10 -15 questions and the time limit of the quiz would be 10 minutes. The quiz can be an e-quiz or pen-paper based depending on the need of the hour. Content of the quiz will be taken into consideration with average scores.

Final-term: The final-term examination will be a pen-paper based examination, composed 3 sections. Section A consists 5 questions of each 2 marks, student have to attempt all questions. Section B consists 2 & 3 questions of 6 marks each with internals questions. Section C consists question 4 (a) and 4 (b) of 4 marks each, students have to attempt both the questions.

CO and PO Mapping

3 - Highly Mapping
 2 - Medium Mapping
 1 - Low Mapping

	PO1	PO2	PO3	PO4	PO5
CO1	3	1	1	1	2
CO2	1	3	1	3	1
CO3	1	2	1	3	3
CO4	1	2	3	1	3

Curriculum

Unit-1 Contextual Business Writing:

Business letters dealing with different situations in the corporate

Unit-2 Technical Writing:

Advanced report writing, focusing on various elements of formal reports 3

Unit-3 Advanced Presentation:

Incorporating visual aids during presentations, focus on delivery, question and answer handling

Unit-4 Crisis Communication:

Managing to deal with crisis by developing crisis combat plans and responding effectively during crisis.

Unit-5 Integrated Communication Plan:

Project work on comprehensive communication plan for a hypothetical business scenario

Academic integrity

a. **Plagiarism** is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable at GIMS and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.

a. **Cheating** means using written, verbal or electronic sources of aid during an examination/ quiz/ assignment or providing such assistance to other students (except in cases where it is expressly permitted by the faculty). It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

Marketing Analytics

Course Code	DMM-01
Course Credits	3
Term	III
Session duration	60 mins each session

Introduction

The program is focused on practical application, with a significant emphasis on exercises marketing. Throughout the course, fundamental concepts related to marketing metrics will be reviewed and put into practice using real-world industrial data. The course objective is to foster a comprehensive understanding of marketing analytics principles. With the use of marketing analytics, students will be able to understand, interpret, control, and analyze consumer trends and preferences in addition to assessing marketing efficacy using excel. The course aims to achieve level 3 of Bloom's taxonomy.

Programme Outcomes

After completing PGDM Programme student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understand the concepts of marketing analytics
CO2	Interpret strategies related to marketing analytics for better understanding of market scenarios.
CO3	Apply concepts and strategies related to marketing analytics for better marketing decision making.

Pedagogy

The course will be based on Classroom lectures on class-discussions and cases. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning.

Text Book

1. Baig, Mirza Rahim, Gururanjan Govinda & Shrimali, V.R. (2021). Data Science for Marketing Analytics, Pakistan.

Reference Books:

1. France, S. L., & Ghose, S. (2019). Marketing analytics: Methods, practice, implementation, and links to other fields. Expert Systems with Applications, 119, 456-475.
2. Gupta, Seema & Jathor A. (2022) Marketing analytics, New delhi, wiley.

CO and PO Mapping

2 - Medium Mapped

2 - Low Mapping

	PO1	PO2	PO3	PO4	PO5
CO1	3	-	-	-	1
CO2	1	2	3	-	2
CO3	1	3	-	2	3

Curriculum**UNIT -1 Introduction**

Introduction to marketing analytics and its scope, using excel to summarize marketing data: slicing and dicing marketing data with pivot tables, using excel charts to summarize marketing data, using excel functions to summarize marketing data.

Unit -2 Product Analytics

Forecasting: simple linear regression and correlation, using multiple regression to forecast sales, forecasting during special events, modeling trends and seasonality, ratio to moving average forecasting methods, winter's method.

Unit – 3 Pricing and Customer Analytics

Pricing: Estimating demand curves and using solver to optimize price, price bundling, nonlinear pricing, price skimming and sales, revenue management.

Customer Value: calculating lifetime customer value, using customer value to value a business, customer value, Monte Carlo simulation and marketing decision making, allocating resources between customer acquisition and retention.

Unit – 4 Retailing Analytics

Retailing: market basket analysis and lift, RFM analysis and optimizing direct mail campaigns, using SCAN*pro model and its variants, allocating retail space and sales resources, forecasting from few data points.

Unit – 5 Advertising Analytics

Advertising: measuring the effectiveness of advertising, media selection models, pay per click (PPC) online advertising.

SALES AND DISTRIBUTION MANAGEMENT

Course Code	DMM-02
Course Credits	3
Term	III
Session duration	60 mins each session

Introduction

This course will help the students to develop critical skills for generating, evaluating and selecting sales and distribution and retail strategies. This subject will cover the concepts, attitudes, techniques and approaches required for effective decision making in the areas of Sales and Distribution.

The course objective is to foster a comprehensive understanding of sales management principles, including modern roles, skills, and the impact of e-commerce and international sales and develop proficiency in strategic sales planning, forecasting, organizational structures, quotas, and promotions for effective sales performance. The course will equip students with expertise in sales management and channel management, distribution concepts and supply chain management. The course aims to achieve level 3 of Bloom's taxonomy.

Programme Outcomes

After completing PGDM Programme student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understand the concepts of sales, distribution and channel management.
CO2	Interpret strategies related to sales, distribution and channel management.
CO3	Apply concepts and strategies related to sales, distribution and channel management.

Pedagogy

The course will be based on Class room lectures on class-discussions and cases,. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning.

	PO1	PO2	PO3	PO4	PO5
CO1	3	-	-	1	1
CO2	1	-	3	1	2
CO3	1	3	-	2	3

Curriculum

UNIT- 1

Introduction to Sales Management: Overview of Sales Management, Careers in Sales Management, Modern Roles and Required Skills for Sales Managers. Understanding Sales Force Management, International Sales Management.

UNIT- 2

Sales Planning and Organization: Sales planning, Sales forecasting methods, Organizing & Driving Sales Efforts - Sales Organization Structures, Sales Quotas, Sales Promotion

UNIT- 3

Sales force administration and management: Sales budgets, sales territories, training and motivation of sales force, sales force conflict, sales reports and audits and performance evaluation of sales force

UNIT- 4

Personal Selling & Salesmanship: Personal Selling process, Theories of personal selling, Prospecting, Lead generation, Market mapping, customer profiling, pre approach and approach, Presentation, Product demonstration, Negotiation, Closure and follow up, sales cycle & cash cycle.

UNIT- 5

Distribution & channel Management: Channel Management-Introduction, Marketing Channels, Designing Channels, Selection and Recruitment of Channel Partners, Factors affecting channel selection, Channel Motivation, Channel Relationships Management, Channel Evaluation, channel conflict and mitigation, Wholesaling: Trends & Challenges, E-Retailing. Channel Switching behavior Webrooming and showrooming

COMPENSATION AND PERFORMANCE MANAGEMENT

(DMH-01)

Course Code	DMH 01
Course Credits	3
Term	III
Session duration	60 mins each session

Introduction:

The curriculum will enable the students to identify different forms of and performance and compensation management & their distinctive features and explain their relevance in a particular business context. They will examine what makes an organization, how organizations evolve and what makes them effective.

Programme Outcomes

After completing PGDM a student should be able to;

PO1	Understand fundamentals of all functional areas of management.
PO2	Apply the management knowledge to take better decisions for various given business scenarios.
PO3	Critically understand the business problems and find right management tool to solve them.
PO4	Demonstrate values, ethics, leadership and teamwork.
PO5	Higher employability quotient.

Course Outcomes

After taking this course a student shall be able to;

CO1	To understand the fundamentals Performance Management
CO2	To understand techniques of appraising the performance of employees.
CO3	To develop the ability to handle compensation and Incentive schemes in a company

Pedagogy

The teaching methodology will include lectures using power point, case studies, articles, group discussions and presentations. Interaction during lectures will be encouraged and therefore each student is expected to add valuable inputs during lectures by sharing his/her knowledge. Students will be required to work on the assignments and individual presentations.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

INDUSTRIAL RELATIONS AND HR LEGISLATIONS

Course Code	DMH 02
Course Credits	3
Term	III
Session duration	60 mins each session

Introduction:

The entire course will acquaint the students with concepts of Industrial relation aims at maintaining healthy, harmonious and cordial relationship between the employees and management and amongst the employees.

Programme Outcomes

After completing PGDM a student should be able to;

PO1	Understand fundamentals of all functional areas of management.
PO2	Apply the management knowledge to take better decisions for various given business scenarios.
PO3	Critically understand the business problems and find right management tool to solve them.
PO4	Demonstrate values, ethics, leadership and teamwork.
PO5	Higher employability quotient.

Course Outcomes

After taking this course a student shall be able to;

CO1	To understand the fundamentals of Industrial Relations and Labor Legislations
CO2	To understand the basic concepts laws governing wages and social security.
CO3	To develop the ability to handle conflicts and disputes thereby acquiring the compliances

Pedagogy

The teaching methodology will include lectures using power point, case studies, articles, group discussions and presentations. Interaction during lectures will be encouraged and therefore each student is expected to add valuable inputs during lectures by sharing his/her knowledge. Students will be required to work on the assignments and individual presentations.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Security Analysis and Portfolio Management

Course Code	DMF-01
Course Credit	3
Term	III
Session duration	60 mins each session

Introduction

Security and portfolio analysis encompass evaluating diverse options to build portfolios tailored toward achieving precise financial objectives while mitigating risk. This process entails assessing the risk linked to each investment, identifying how investments can synergize to mitigate risk, and utilizing diversification to counter losses in case of underperformance within a specific sector or asset class. Strategic allocation of funds across a spectrum of asset classes such as stocks, bonds, real estate, and commodities hinges on factors like risk tolerance, investment timeline, and desired financial milestones. The course is designed to meet the **applied level of Bloom's taxonomy at specific points, but largely it is designed to meet the level of understanding and application of the taxonomy.**

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Fundamental concepts of investment analysis, portfolio construction, and risk management
CO2	It helps to develop the ability to assess and manage risks associated with diverse investment opportunities, understanding their impact on portfolio performance.
CO3	Familiarity with analytical tools like Modern Portfolio Theory (MPT), Capital Asset Pricing Model (CAPM), and performance evaluation metrics for effective portfolio analysis and optimization.

Pedagogy

The course will be based on Class room lectures, Exercises based on financial models using excel, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

PROJECT FINANCE AND FINANCIAL MODELING

Course Code	DMF-01
Course Credit	3
Term	III
Session duration	60 mins each session

Introduction

Project finance refers to a specialized funding method used to finance long-term infrastructure, industrial, and other significant projects. In project finance, the financing structure is based on the project's cash flow and assets rather than the creditworthiness of the project sponsors. It involves multiple parties, such as investors, lenders, and sometimes government entities, collaborating to fund and manage a specific project. This funding method is often used for large-scale projects like building infrastructure, power plants, and public-private partnerships. Financial modeling, on the other hand, is a process of creating a mathematical representation (a model) of a real-world financial situation. It involves using historical data, assumptions, and projections to forecast future financial performance. Financial models are created using spreadsheets or specialized software and can simulate various scenarios to help in decision-making processes. The course is designed to meet the **applied level of Bloom's taxonomy at specific points, but largely it is designed to meet the level of understanding and application of the taxonomy.**

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Developing a strong ability to analyze financial data, interpret results, and make informed decisions.
CO2	Enhancing problem-solving skills in financial contexts, especially related to project finance, mergers, and feasibility analysis.
CO3	Being able to summarize and present complex financial data and analysis to top management or stakeholders effectively.

Pedagogy

The course will be based on Class room lectures, Exercises based on financial models using excel, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

	PO1	PO2	PO3	PO4	PO5
CO1	3	2	1	-	-
CO2	2	3	3	-	3
CO3	1	3	3	2	2

Curriculum

UNIT-I: Introduction to Financial Modeling

Introduction of Financial modeling; Financial modes: Static Vs Dynamic models; Needs and Applications Combining the tools and theory into the model: Define and structure the problem; Define the input & output Variables of the model; Understand the financial & mathematical aspects of the model; design the model; Create the spread sheet; test the model; protect the model; Document the model; Maintain the model.

UNIT-II: Financial Feasibility Model & Merger Modeling

Financial Feasibility Model: Inputs – assumptions, intermediate statements; capital expenditure statement; sources of finance and debt servicing; income and expense statements, working capital and depreciation statements. Output- Profit and loss statement, balance sheet, cash flow, key ratios; Summary of key results to top management, Merger Modeling and LBO Valuation and Modeling. (As suggested by Expert)

UNIT-III: Project Finance

Project finance; risk analysis in project finance; capital and operating cash flows in project finance' Control accounts and cash flow waterfall, covenants in project finance.

UNIT-IV: Modeling Project Finance

Assessing the project debt service capability using DSCR (Debt Service Cover Ratio), LLCR (Loan Life Cover Ratio), PLCR (Project Life Cover Ratio); Debt Sculpting, Debt service reserve ratio (DSRA), Maintenance reserve account (MRA); Valuation analysis; Model optimization.

Unit V: Advanced Financial and Project Modeling

Modeling techniques- Equity first- debt withdrawn method; Debt sizing automation, Revisiting debt reserve account, revisiting scenario analysis

Academic integrity

Analytics for Managers using Python

Course Code	DMB 01
Course Credit	3
Course	PGDM
Term	III

Introduction

This Python code and associated tasks form a robust end-to-end data analysis and visualization pipeline. It not only ensures the cleanliness and readiness of the data for analysis but also employs a variety of visualization techniques, from basic to advanced, to tell a compelling and informative story about the real-world dataset. The inclusion of interactive dashboards enhances user engagement and facilitates interactive exploration of the dataset's insights.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Importing data from diverse sources, explore datasets and ensuring effective data manipulation.
CO2	Expertise in descriptive statistics, visualization methods and correlation analysis, enabling them to draw meaningful insights from data using Matplotlib and Seaborn.
CO3	Develop skills in creating compelling visualizations, facilitating effective data storytelling and communication.
CO4	Understand the fundamentals interactive dashboard creation, and build a strong foundation in Python packages for data science.

Pedagogy

The course will be based on Class room lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Curriculum

Unit-1 Data Sets

Course Introduction, Understanding the Data, Python Packages for Data Science, Getting Started Analysing Data in Python, Accessing Databases with Python

Unit-2 Data Pre-processing and Cleaning

Importing data from various sources (CSV, Excel, SQL), Exploring and understanding the dataset, Handling missing data: imputation techniques, Dealing with outliers and anomalies, Data transformation: normalization, standardization, Data integration and manipulation using pandas

Unit-3 Exploratory Data Analysis (EDA)

Descriptive statistics: mean, median, mode etc., Histograms, box plots, scatter plots, Correlation analysis and heatmaps, Data visualization using Matplotlib and Seaborn

Unit-4 Data Visualization

Advanced data visualization techniques: bar plots, line plots, pie charts, etc., Interactive visualizations using Plotly, Geospatial visualization, Effective data storytelling and communication

Unit-5 Dashboard with plotly & Dash

Academic integrity

a. **Plagiarism** is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable at GIMS and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.

b. **Cheating** means using written, verbal or electronic sources of aid during an examination/ quiz/ assignment or providing such assistance to other students (except in cases where it is expressly permitted by the faculty). It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

BASIC SQL FOR DATA ANALYTICS

Course Code	DM 305
Course Credit	3
Course	PGDM
Term	III

Introduction

This course emphasis is on understanding the Developing and managing efficient and effective database applications requires understanding the fundamentals of database management systems, techniques for the design of databases, and principles of database administration. This course emphasized database concepts, developments, use and management in three main sections: database concepts, practice, and emerging trends. Practical application of Relational database systems and its command.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understand the fundamental elements of relational database management systems. Will be clear with the basic concepts of relational data model, entity-relationship model, relational database design, relational algebra and SQL.
CO2	Design ER-models to represent simple database application scenarios. Enhance the knowledge of the processes of Database Development and Administration using SQL.
CO3	Convert the ER-model to relational tables, populate relational databases and formulate SQL queries on data. Execute the commanding functions on various DB platforms.

Pedagogy

The course will be based on Classroom lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

	PO1	PO2	PO3	PO4	PO5
CO1	1	2	3	2	3
CO2	2	1	2	2	2
CO3	1	1	3	2	2

Curriculum

Unit-1 Introduction: Introduction to database, relational data model, DBMS architecture, data independence and data abstraction, DBA, database users, end users, front end tools.

Data Modelling: Entity types, entity set, attribute and key, relationships, relation types, ER diagrams, database design using ER diagrams.

Unit-2 Relational Data Model: Relational model concepts, relational constraints, primary and foreign key, candidate key, alternate, composite, super-key. Structured Query Language: Introduction to SQL, concepts of Data Definition Language (DDL) and Data Manipulation Language (DML), DDL queries like create a data base, drop a database, create table, drop table, alter table, DML queries like inserting data in a table, update in a table, delete data from a table.

Unit-3 Create relationships between database tables, aggregate functions - min, max, count, average, sum, nested sub-queries, group by, having, order by. Join operations - inner, left join, right join, natural join.

Unit-4 Introduction to NoSQL Databases, NoSQL features, Different types of NoSQL databases. Introduction to MongoDB, MongoDB architecture MongoDB, Data modelling in MongoDB, Advantages of MongoDB over RDBMS, Mongo Shell, Configuration file in MongoDB, Documents and collections.

Unit-5 JSON File format for storing documents, Database Commands in MongoDB, Inserting and Saving Documents, Inserting Multiple Documents, Updating Documents, Removing Documents, Document Replacement, Operator and Modifiers.

Academic integrity

It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

International Logistics and Shipping Operations

Course Code	DMIB 01
Course Credit	3
Term	III
Session duration	60 mins each session

Introduction

This course is a comprehensive course designed for students to understand global logistics complexities. It focuses on critical aspects like issues in international logistics, understanding sales contracts, and in-depth exploration of forecasting models in supply chain management. This curriculum is structured to provide students with practical and theoretical knowledge essential for navigating the dynamic field of international logistics, ensuring they are well-equipped to handle the challenges and opportunities in this sector.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	To help students understand the issues in International Logistics.
CO2	To provide an understanding of Sales Contract in International Logistics.
CO3	To understand the international logistics and transportation system.

Pedagogy

The course will be based on Class room lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

	PO1	PO2	PO3	PO4	PO5
CO1	3	3	2	1	1
CO2	3	2	2	1	1
CO3	3	3	2	2	1

Curriculum

Unit-1 Foundation Concepts in International Logistics

Managing the Supply Pipeline for Global Trade Flows, The Global Logistics Operators, Comparison between National and International Logistics, International Transport System, Globalisation and International Trade Environment. Factors Driving Global Supply Chain Management, Customs and Global Supply Chain Management. Case Studies and Latest Updates

Unit-2 Export Sales Contract in International Logistics

Constituents of the Export Sales Contract, Contract of Affreightment: Terms of Delivery & Incoterms standards. International Purchasing Systems- Constituents, Strategy and its Interface with the Management of the Global Supply Chain, Negotiating the Contract, Selecting the International Logistics Operator, Criteria of Selecting the Third-Party Logistics Operator.

Unit-3 Integrating International Logistics with Supply Chain

Trade-Offs in International Logistics, Multi-Modalism, Key Factors in a Transport Mode(s) & Trade-Off. Considerations of Speed, Frequency, Packing and Insurance in International Transportation. Warehousing & Benchmarking in Global Supply Chain Management, Demand-Driven Supply Network in International Logistics.

Unit-4 International Transport Systems

Introduction to International Transport System- Basic Terms, Characteristics and Relations, Significance of Transportation Services, Characteristics of Modes of Transports -Road Transportation, Rail Transportation, Maritime Transport, Air Transport. Technical performance &

Transport Economic Indicators, Maritime Routing Patterns, The Containerization of Commodities, Transcontinental Bridges.

Unit-5 Cost and Economy of International Logistics

International Transport and Economic Development, Transportation and Commercial Geography, Components of International Transport Costs, International Transport Supply and Demand, Location Analysis, Market Area Analysis, The Nature of International Transport Policy, International Transport Planning, International Transport Safety and Security.

Academic integrity

Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

International Trade Operations & Documentation

Course Code	DMIB 02
Course Credit	3
Term	III
Session duration	60 mins each session

Introduction

"International Trade Operations & Documentation" is a specialized course designed to impart a fundamental understanding of export and import processes in global trade. It focuses on key aspects such as the registration process, payment terms, export costing, and pricing strategies. The course also aims to elucidate the intricacies of shipment procedures, offering a detailed interpretation of these processes. Additionally, it provides a comprehensive overview of the various documents essential in international trade, ensuring students gain practical knowledge and skills. This course is tailored for those seeking to navigate the complex landscape of international trade operations and documentation effectively.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Identify the process of Registration process, Payment terms, Export costing and pricing.
CO2	To promote basic understanding on the concepts of export & import in International Trade.
CO3	Interpret the process of Shipment procedures, & summarize the various documents used in international trade

Pedagogy

The course will be based on Class room lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

STRATEGIC SUPPLY CHAIN MANAGEMENT

Course Code	DMS 01
Course Credit	3
Term	III
Session duration	60 mins each session

Introduction

This course of Strategic Supply Chain Management provides an overview of supply chain management as a key business function that holistically integrates cross functional business processes within the firm and across the network of firms that comprise the supply chain. The challenge is to overcome the major obstacles to manage a supply chain and successfully accomplish this integration. The course will explain the impact of supply chain decisions on the success of a firm and will help students understand how a company achieves strategic fit between its supply chain strategy and its competitive strategy. The course will provide an understanding of the components and processes of supply chain and logistics management as well as the performance drivers of supply chain and the role each driver plays in creating strategic fit between the supply chain strategy and the competitive strategy.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understand the basic concepts of supply chain Management and establish the impact of supply chain decisions on a firm's performance.
CO2	Identify and describe the relationship between supply chain strategy and competitive strategy of a firm.
CO3	Identify the major drivers of supply chain performance & understand the role of each driver in creating strategic fit

Pedagogy

The teaching methodology will include lectures using power point, case studies, articles, group discussions and presentations. Interaction during lectures will be encouraged and therefore each student is expected to add valuable inputs during lectures by sharing his/her knowledge. Students will be required to work on the assignments and individual presentations.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to

augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Supply Chain Network Design

Course Code	DMS 02
Course Credit	3
Term	III
Session duration	60 mins each session

Introduction

This Course provides an understanding of the role of distribution within a supply chain and identify factors that should be considered when designing a distribution network. The goal is to provide managers with a logical framework for selecting the appropriate distribution network given product, competitive, and market characteristics. It also identify and discuss the various factors that influence the facility location, capacity, and market allocation decisions. It then establish a framework and discuss various solution methodologies for network design decisions in a supply chain. It identify sources of risk for global supply chains, discuss risk mitigation strategies, detail the methodologies used to evaluate network design decisions under uncertainty, and show how they improve global supply chain decisions.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understand the foundational concepts and principles of supply chain networks, emphasizing their significance in modern business operations.
CO2	Analyze the diverse factors influencing network design decisions, such as cost, service levels, and agility, to develop a holistic perspective on network management.
CO3	Identify the key factors to be considered when designing a distribution network

Pedagogy

The teaching methodology will include lectures using power point, case studies, articles, group discussions and presentations. Interaction during lectures will be encouraged and therefore each student is expected to add valuable inputs during lectures by sharing his/her knowledge. Students will be required to work on the assignments and individual presentations.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

2 - Low Mapping

	PO1	PO2	PO3	PO4	PO5
CO1	3	3	3	2	2
CO2	3	3	3	2	3
CO3	3	2	3	2	2

Curriculum

Unit-1 Introduction to Supply Chain Networks

Understanding the fundamentals of supply chain networks and their significance in modern business operations. Overview of supply chain management, Importance of network design in supply chains, Types of supply chain networks (e.g., centralized, decentralized, hybrid), Factors influencing network design decisions (cost, service level, agility).

Unit-2 Distribution Network Design in SCM

Distribution role in SCM, Factors of distribution network, Design Option, e-commerce distribution, selecting and appropriate distribution network

Unit-3 Designing SCM Network

Role of Network Design, Factors of Network design decisions, Framework, Facility location strategies (e.g., centroid, weighted center methods) Greenfield & Brownfields analysis.

Unit-4 Global Supply Chain Network Design.

Globalization & SCM, Total cost decision, Risk in global SCM, Decisions under uncertainty, Onshore and Offshore.

Unit-5 Sustainable and Resilient Supply Chain Networks

Sustainable practices in network design (e.g., green logistics) Resilience in supply chain networks (e.g., risk mitigation, disruption management)

Technology integration for sustainable and resilient networks.

Academic integrity

a. **Plagiarism** is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable at GIMS and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.

b. **Cheating** means using written, verbal or electronic sources of aid during an examination/ quiz/ assignment or providing such assistance to other students (except in cases where it is expressly permitted by the faculty). It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

FOUNDATION OF ENTREPRENEURSHIP AND START-UP

Course Code	DME-01
Course Credit	3
Course	PGDM
Term	III

Introduction

The goals of this course is to inspire students and help them imbibe an entrepreneurial mind-set. The students will learn what entrepreneurship is and how it has impacted the world and their country. They will be introduced to key traits and the DNA of an entrepreneur, and be given an opportunity to assess their own strengths and identify gaps that need to be addressed to become a successful entrepreneur. Apart from entrepreneurial mindset, the course provides a great understanding of data analysis and experiment design that leads to the testing of innovative ideas.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	To understand the DNA of an entrepreneur and assess their strengths and weaknesses from an entrepreneurial perspective.
CO2	To develop the right understanding of Business Plan and how to prepare a business plan.
CO3	To conduct a feasibility analysis of different business and analyse it.

Pedagogy

The course will be based on Class room lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Text Books

	PO1	PO2	PO3	PO4	PO5
CO1	2	3	3	2	1
CO2	3	2	2	1	1
CO3	2	2	1	1	1

Curriculum

Unit-1 Windows of Opportunity:

Environmental change, Technology-new products and pioneers, Market evolution-niches and opportunities, Industrial Development-linkages and opportunities, types of entrepreneur.

Unit-2 Understanding Opportunity:

Criteria for an opportunity, opportunity evaluation, cost of evaluation opportunity, execution trump opportunities; risk, uncertainty and ambiguity; approaches to opportunity evaluation.

Unit-3 Preparation of Business Plan:

Introduction to business plan; Beginning Considerations; Building a competitive advantage; Process of business plan preparation; Strategic Management processes.

Unit-4 Promotion of Business Plan:

Marketing and Financial Considerations; Building a powerful marketing plan, E-commerce and Entrepreneur, Pricing strategies,

Creating successful financial plan, Choosing right location and layout.

Unit-5 Feasibility Analysis:

Conducting a feasibility analysis; forms of Business Ownership; Franchising and Entrepreneurship; Buying an existing business.

Academic integrity

a. Plagiarism is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable at GIMS and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.

b. Cheating means using written, verbal or electronic sources of aid during an examination/ quiz/ assignment or providing such assistance to other students (except in cases where it is expressly permitted by the faculty). It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

Course Code	DME-02
Course Credit	3
Course	PGDM
Term	III

Introduction

The primary objective of this course is to equip participants with the essential skills and knowledge needed to assess, strategize, and execute successful business ventures. The course aims to empower individuals with the ability to navigate the complex landscape of entrepreneurship by fostering critical thinking, strategic planning, and effective communication, ultimately enabling them to create and present compelling business plans to potential investors

Programme Outcomes

After completing PGDM a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate values, ethics, leadership and teamwork.
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	To understand the concept of startups, evaluating product, market, organizational, and financial aspects with precision.
CO2	To develop strategic business modeling expertise, analyzing diverse models and conducting thorough industry and competitor assessments.
CO3	To develop business plan proficiency and effective investor communication skills, ensuring compelling presentations for securing support and funding.

Pedagogy

The course will be based on Class room lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

BUSINESS POLICY & STRATEGIC MANAGEMENT

Course Code	DM - 402
Course Credits	3
Term	IV
Session duration	60 mins each session

Introduction:

This course will prepare students to think strategically in an age when companies like Apple, Google, and Microsoft have become more valuable (in market cap terms) than companies like Exxon. Today, business value and competitive advantage arise more often from consumer perceptions of what is "cool" than from physical assets or economies of scale.

Course objective:

Strategic Management helps to understand holistic view of the organization and it also helps the students to analyze the situation from generalist perspectives. It requires comprehensive, integrated and coordinated approach to formulate and execute effective strategy at different levels of the organization. The course throws the light on strategic formulation and implementation keeping in mind market dynamics and capability of the organization.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	To be able to understand holistic view of the organization.
CO2	To analyze the situation from generalist perspectives
CO3	To Provide comprehensive, integrated and coordinated approach to formulate and execute effective strategy at different levels of the organization.
CO4	To demonstrate critical thinking skills so as to become future-oriented decision makers, problem solvers and innovators.

Pedagogy

The course will be based on Class room lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

- b. Cheating** means using written, verbal or electronic sources of aid during an examination/ quiz/ assignment or providing such assistance to other students (except in cases where it is expressly permitted by the faculty). It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

Human Resource Planning

Course Code	DMH 03
Course Credits	3
Course for	PGDM
Term	IV

Introduction:

The entire course will enable the students to ensure best fit between employees and jobs, while avoiding workforce shortages or spares. The curriculum will enable the students in forecasting labor demand, analyzing present labor supply, and balancing projected labor demand and supply.

Course Objective:

The basic objective of this course is to develop competency in business planning by allowing students to assess the current human resource capacity based on their competencies against the capacity needed to achieve the vision, mission and business goals of the organization. Targeted human resource strategies, plans and programs to address gaps (e.g., hiring / staffing; learning; career development; succession management; etc.) are then designed, developed and implemented to close the gaps.

Programme Outcomes

After completing PGDM a student should be able to;

PO1	Understand fundamentals of all functional areas of management.
PO2	Apply the management knowledge to take better decisions for various given business scenarios.
PO3	Critically understand the business problems and find right management tool to solve them.
PO4	Demonstrate values, ethics, leadership and teamwork.
PO5	Higher Employability quotient.

Course Objective:

After taking this course a student shall be able to;

CO1	Understand the essential elements of human resources planning (HRP) processes in organizations
CO2	Discuss and demonstrate Analysis of Job and methods used in forecasting.
CO3	Application of Strategic HRP in business organization and Succession Management

Pedagogy

The course will be based on classroom lectures through power point. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Text Books:

1. Human Resource Planning, Deepak Kumar Bhattacharyya.
2. Human Resource Planning Dr. Payal Upadhyay & Ms. Shivani Mishra.

Reference Books:

1. Human Resource Management G.S. Sudha.
2. Human Resource Management Robert L. Mathis.
3. Human Resource Management John H. Jackson.
4. Human Resource Planning & Development, Vikrant Verma , Thakur Publication

HR ANALYTICS AND METRICS PROFESSIONAL

Course Code	DMH 04
Course Credits	3
Course for	PGDM
Term	IV

Introduction

HR Analytics and Metrics Professional is an important core course designed for PGDM students or pursuing HRM as specialization as well as HR professionals. This course is related to various HR metrics and its importance from an enterprise point of view. In this course students will learn different HR Functions and how to quantify them for effective decision making for your organization. Also, it will have a better understanding better control, and better hold of this function, so we can contribute in the large manner to the overall business objective. All in all, to align our HR objective to put it toward the overall business goal, one must have to fine tune this HR function, so that we can able to quantify them. The course is structured to meet the **apply level of bloom's taxonomy at certain points but largely it is designed to meet the level of understanding level of the taxonomy.**

Programme Outcomes

After completing PGDM a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership and teamwork skills
PO5	Higher employability quotient

Course Objective:

1. To provide better insight into each of the human resource processes, gathering related data and then using this data to make informed decisions on how to improve these processes.
2. Understand the importance of HR metrics and analytics in measuring HR 's impact and drive business results.
3. Identify the right HR metrics (what to measure, types of measurements etc.), Aligning HR and business goals.

4. Turn metrics into analytics for effective management decisions.

Programme Outcomes

After completing PGDM a student should be able to;

PO1	Understand fundamentals of all functional areas of management.
PO2	Apply the management knowledge to take better decisions for various given business scenarios.
PO3	Critically understand the business problems and find right management tool to solve them.
PO4	Demonstrate values, ethics, leadership and teamwork.
PO5	Higher Employability quotient.

Course Outcomes

After taking this course a student shall be able to;

CO1	To have a practical understanding of HR metrics.
CO2	To learn about HR analytics and its application in business.
CO3	To learn about performance enhancement measures and its relation with HR metrics.

Pedagogy

The course will be based on classroom lectures through power point. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Text Books:

1. The 12 Best HR Analytics Books on Our Reading List
2. Human Capital Analytics: How to Harness the Potential of Your Organization's Greatest Asset
3. Human Resource Information Systems: Basics, Applications, and Future Directions
4. The Basic Principles of People Analytics: Learn How to Use HR Data to Drive Better Outcomes for Your Business and Employees

Organizational Development and Change Management

Course Code	DMH-05
Course Credits	3
Course	PGDM
Term	IV

Introduction

The entire course will enable the students to understand the key concepts of Organizational development and how to manage change in an Organization.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understand the better insight into each of the Organizational development and how to incorporate change
CO2	Designing the HR Operating Models.
CO3	Analyse how to manage change in an Organization and develop leadership values

Pedagogy

The course will be based on Class room lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear their doubts after the classroom.

Textbooks:

1. Best Practices in Organization Development and Change: Culture, Leadership, Retention, Performance Coaching (Louis Carter, David Giber, Marshall Goldsmith, Richard F. Beckhard, W. Warner Burke, Edward E. Lawler III, Beverly L. Kaye, Jay Alden Conger, John Sullivan) Human Capital Analytics: How to Harness the Potential of Your Organization's Greatest Asset
2. Organization Development & Change (Thomas G. Cummings & Christopher Worley):
- 3 The Change Champion's Field Guide: Strategies and Tools for Leading Change in Your Organization (Louis Carter and Roland L. Sullivan)

FINANCIAL DERIVATIVES

Course Code	DMF-03
Course Credits	3
Course	PGDM
Term	IV

Introduction

Financial derivatives are financial instruments whose value is derived from the value of an underlying asset, index, or rate. A course in financial derivatives focuses on understanding these instruments and their applications in financial markets. It equips learners with the knowledge and skills necessary to analyze, value, and manage derivative products effectively. The course is designed to meet the **applied level of Bloom's taxonomy at specific points, but largely it is designed to meet the level of understanding and application of the taxonomy.**

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Ability to examine the future market.
CO2	Develop and implement comprehensive derivative trading strategies
CO3	Capacity to identify the binomial model and black Scholes model and their implementations.

Pedagogy

The course will be based on Class room lectures, Exercises based on financial derivatives using excel, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

TAX PLANNING AND MANAGEMENT

Course Code	DMF-04
Course Credits	3
Course	PGDM
Term	IV

Introduction

Tax Planning and Management is an important area of study for management graduates. The course hones the aspirants' decision-making skills regarding their personal as well as corporate tax planning and management. The course provides learning about the rules and regulations related to computation as well as tax management. The industry scope of the course is very high as tax management is one of the key decisions to be taken by managers of finance. It is contemporary as it helps the organizations to not only reduce their tax liabilities but also helps them in avoiding any kind of penal actions due to negligence.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understand the basic concepts of taxation
CO2	Learn various rules to calculate tax on income and rules related to ITR filing
CO3	Develop capabilities of tax planning for individuals and corporates in India

Pedagogy

The course will be based on Class room lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Business Intelligence and Data Mining (BIDM)

Course Code	DMB-03
Course Credit	3
Course	PGDM
Term	IV

Introduction

This course emphasis is on understanding the application of a wide range of modern techniques to specific decision-making situations. The course covers how to identify, design and develop analytical information systems, such as Business Intelligence with a descriptive analysis on data warehouses. It also introduces cutting edge interactive data-visualization tools using data mining techniques, classification, clustering on large data sets. The course is structured to meet the apply level of bloom's taxonomy at certain points but largely it is designed to meet the level of understanding of the Data mining.

Programme Outcomes

After completing PGDM a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership and teamwork skills
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understanding the fundamentals of Business Intelligence empowers businesses to leverage data for better decision-making
CO2	Articulate data warehousing that can support decision-making processes in a business.
CO3	Understanding data mining allows businesses to extract valuable insights from large datasets for data-driven decision making.
CO4	Interpret classification and prediction methods to make accurate predictions, leading to better decision-making in various industries.

Data Analytics Using Power-BI

Course Code	DMB-04
Course Credit	3
Term	IV
Session duration	60 mins each session

Introduction

This course emphasis on understanding the latest and most advanced custom visualizations in Microsoft Power BI, where students will learn to create histograms, bar charts and more. Students will be using skills as a data scientist to extract knowledge from data so they can analyse and visualize complex questions with ease. This course would enable working with scientific data and to understand business complexities through ease of business modelling and visual analytics so that they evolve into managers for decisive decision making. Students would be able to Connect Power BI to a Variety of Datasets ,Drill Down and Up in Your Visualization and Calculate and Visualize Data in the Form of Various Charts, Plots, and Maps

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understand and develop data analysis skills using tools like Power-BI which empower data to be converted in to visualizations in the form of dashboards for managerial decision making.
CO2	Design and develop ETL process with data modelling skills for effective data visualization enablement.
CO3	Enable to collect, examine, and present data for any purpose, so as to implement the data interpretations through dashboards in to business management decisions.

Pedagogy

The course will be based on Classroom lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups on the platform of Power-BI Desktop and create dashboards on varying data sets from variety of business domains. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Text Book

1. Mastering Power BI: Build Business Intelligence Applications Powered with DAX Calculations, Insightful Visualizations, Advanced BI Techniques, and Loads of Data Sources by Chandraish Sinha.
2. Power BI Data Modeling: Build Interactive Visualizations, Learn DAX, Power Query, and Develop BI Models by Nisal Mihiranga

Reference Book

Unit-1 Introduction to Power BI Desktop

- Module Introduction
- Understanding the Power BI Desktop Workflow
- Exploring the Interface of the Data Model
- Understanding the Query Editor Interface

Unit-2 Working in Query Editor

- Connecting Power BI Desktop to Source Files
- Keeping & Removing Rows
- Working with Filters
- Removing Empty Rows
- Appending Queries
- Working with Columns
- Replacing Values
- Splitting Columns
- Merging Queries

Unit-3 Understanding the Data Model

- Understanding Schemas : Star Schema and Snowflake schema
- Cardinality
- Relationships among tables using Primary and Foreign Key

Unit-4 Creating Visuals in Report View

- Understanding Basic Visual Concepts
- Understanding Tooltips & Interactions
- Using the Slicer
- Understanding Filter Types (Visual, Page & Report)
- Using Custom Visuals

Working on use case to create a project

Unit-5 Understanding DAX

- The DAX Syntax
- Difference between Calculated Columns vs Measures
- Understanding IF & RELATED
- Creating Measures

Assignment (project) presentations and discussions on the platform Power-Bi

Academic integrity

a. Plagiarism is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable at GIMS and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.

a. Cheating means using written, verbal or electronic sources of aid during an examination/ quiz/ assignment or providing such assistance to other students (except in cases where it is expressly permitted by the faculty). It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

Data Analytics Using Tableau

Course Code	DMB-05
Course Credit	3
Term	IV
Session duration	60 mins each session

Introduction

This course tries to emphasize the practical real-world applications of skills of data analytics in helping solve problems in organizations through systemised data handling using tools like Tableau. Students would be able to bridge the gaps of understanding of data handling using data exploration, data visualization and insight discovery. The course emphasizes the concepts of diverse visualizations from basic charts to development of interactive data dashboards. It provides compelling data driven dashboard building strategies for effective user interaction and data interpretation of data analysis for business implementations.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understand and develop practical real-world applications of skills required for data handling and data analysis through CRISP-DM methodology of data science.
CO2	Design and develop data exploration and gain insights in to business through creation of data dashboards by understanding the ETL and modelling skills
CO3	Enable to collect, examine, and present data for any purpose, so as to implement the data interpretations through dashboards in to business management decisions.

Pedagogy

The course will be based on Classroom lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups on the platform of Power-BI Desktop and create dashboards on varying data sets from variety of business domains. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Curriculum

Unit-1 Introduction: Visual Analytics with Tableau

- The Importance of Visual Analytics
- The Tableau Product Suite
- Introduction to Tableau Desktop
- Data Visualization Using Tableau Desktop

Unit-2 Data Preparation: Using Tableau Desktop

- Connecting to a Data Source
- Various Joins in Tableau

- Data Transformation in the Data Pane
- Concept of Logical and Physical Table
- Append and Merge

Understanding of CRISP-DM as a Data science methodology

Unit-3 Introduction to fundamentals of Basic Visual Analytics

- Visual Analytics
- Basic Charts: Bar Chart, Line Chart, and Pie Chart
- Hierarchies
- Data Granularity
- Highlighting
- Sorting
- Filtering
- Grouping
- Sets

Unit-4 Advanced Reporting Features in Tableau

- Slicing & Filtering Data
- Configuring Worksheet Filters
- Configuring Time lines Filters with Date Filters
- Apply Advanced Filter Options
- Create Interactive Filters

Unit-5 Saving, Publishing, and Sharing Data

- Save Data Sources
- Publish Data Sources and Visualizations Share Workbooks for Collaboration

Dashboard Creation (Project Execution) presentations and oral viva

Academic integrity

World Trade Organization & Regional Trading Blocks

Course Code	DMIB 03
Course Credits	3
Term	IV
Session duration	60 mins each session

Introduction

Almost, all of the entire world trade covering both goods and services comes under the rules of WTO; even though, there are disagreements on the specific provisions and on the future expansions of the WTO coverage. Thus, any discussion on economic development and policy making has to take into cognizance the WTO framework of international trade. While the WTO framework of international trade has been the best trade agreement the world ever had in terms of transparency, rule based system, nondiscrimination, enforceability etc., not all trade issues and disagreements have been resolved under the WTO system.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

- **CO1:** To understand the importance of regional Grouping economics.
- **CO2:** To understand the trade policies and its outcomes.
- **CO3:** To understand the functions organizations that facilitate international trades

Pedagogy

The teaching methodology will include lectures using power point, case studies, articles, group discussions and presentations. Interaction during lectures will be encouraged and therefore each student is expected to add valuable inputs during lectures by sharing his/her knowledge.

Students will be required to work on the assignments and individual presentations.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the

classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Text Books:

1. WTO by Palle Krishnan Rao.

Thrust Product & Thrust Market

Course Code	DMIB 04
Course for	PGDM
Term	IV
Session duration	60 mins each session

Introduction

Introduction: To boost up India's export, the Ministry of Commerce and Industry, Government of India re-introduced a concept of Thrust Product and Thrust Market in the Foreign Trade Policy (2015-2020). Earlier the concept was known as Focused Product, Focused Market and Market Linked Focused Product scheme. The trade scenario and dynamics in India is different for different products, natural – climatic conditions intertwined with Government's policies has an enormous impact which affects the trade performance. This course is designed to analyze and understand the thrust products and markets and understand the domestic scenario. This course will be informative and useful for the students of International Business who wish to join Export – Import firms or, have entrepreneurial plans in the export sector. The pedagogy in use will be discussions, followed by presentations by students. The guest lectures will be delivered by practitioners in different Export Promotion Councils.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios

PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

- **CO1:** To understand the concept of thrust products and thrust markets.
- **CO2:** To understand the assistance provided by different organizations to boost Export-Import business.
- **CO3:** To identify role of export of different commodities in global trade.

Pedagogy

The teaching methodology will include lectures using power point, case studies, articles, group discussions and presentations. Interaction during lectures will be encouraged and therefore each student is expected to add valuable inputs during lectures by sharing his/her knowledge.

Students will be required to work on the assignments and individual presentations.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Text Books:

1. Export Import Management by Justin Paul and Rajiv Aserkar, 8th edition, Oxford Publishers.(referred as JP in the Course Outline)

Reference Books:

1. Global Trade in the new millennium by Swami Dr. Parthasarathy from Biztantra Publication
2. WTO, INDIA and EMERGING AREAS edited by P. Rameshan from Excel Books.
3. A study of World Trade Organization by K. R Gupta from Atlantic Publishers and Distributors.

4. Journal of the IIFT on WTO.

Curriculum

Unit-1 Introduction to Thrust Product and Thrust Market

Concept of Thrust Product & Thrust Market with ITC (HS) codes, provisions in the FTP, Roles of Export Promotion Councils and Commodity Boards. Domestic scenario (manufacturing/sourcing), export potential, export analysis & import analysis – framework

Unit-2 Indian Exports commodities Part I

Overview of global market, Apparel exports, Leather products, Engineering goods& Electronics export.

Unit-3 Indian Exports commodities Part II

Service exports from India, Export of Agro Commodities – Coffee, Tea, Rubber, and Tobacco & Spices, Export of Petroleum and Chemical products

Unit-4 Indian Exports of Principal Commodities

Handicrafts export, Gems & Jewellery export, Pharmaceutical exports, Toys export, defense etc.

Unit-5 Indian Thrust Markets

India's Main export partners, India's trade with UAE, US, China, Singapore etc. Strategy for Doubling export. Growth and direction of Indian export.

Academic integrity

a. Plagiarism is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable at GIMS and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.

b. Cheating means using written, verbal or electronic sources of aid during an examination/ quiz/ assignment or providing such assistance to other students (except in cases where it is expressly permitted by the faculty). Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

INVENTORY & WAREHOUSING MANAGEMENT

Course Code	DMSCML-03
Course Credits	3
Term	IV
Session duration	60 mins each session

Introduction

Inventory management helps companies identify which and how much stock to order at what time. It tracks inventory from purchase to the sale of goods. The practice identifies and responds to trends to ensure there's always enough stock to fulfill customer orders and proper warning of a shortage. The course is structured to meet the **apply level of bloom's taxonomy at certain points but largely it is designed to meet the level of understanding level of the taxonomy.**

Programme Outcomes

After completing PGDM a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership and teamwork skills
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO 1	To understand the basic concepts and various functions of Warehouse.
CO 2	To impart knowledge on various types of warehouses and their advantages.
CO 3	To Study the identification of various materials and material storage systems, material handling equipment
CO 4	To impart knowledge on Inventory management and focusing towards classification of various types of Inventories.

Pedagogy

The course will be based on classroom lectures sessions. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

SOURCING AND VENDOR MANAGEMENT

Course Code	DMS 04
Course Credits	3
Course for	PGDM
Term	IV
Session duration	60 mins each session

Introduction

This course of sourcing & vendor management gives an insight into how purchases and vendor relationships affect the entire organization and deliver bottom line improvement through a much greater understanding of Sourcing and Vendor Management. Sourcing has always stood on the boundary of the firm, looking outside, and scanning the environment for new opportunities and threats. When dealing with suppliers, sub-optimization must be prevented because it is very tempting to make price the central issue in negotiations. Strategic purchasing and supply management is more than just negotiating a deal with suppliers. It is about managing supplier relationships in such a way that suppliers actively support the company's overall business strategy and value proposition. It is about fostering a climate where suppliers are challenged to continuously improve their performance and add value to the organisation.

The course will provide an understanding about how integrating suppliers in the company's overall business processes will help boost productivity. It is about developing the physical and information infrastructure to enable these new ways of working.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork

PO5	Higher employability quotient
-----	-------------------------------

Course Outcomes

After taking this course a student shall be able to;

- **CO1:** To understand fundamentals of Sourcing, purchasing and materials management.
- **CO2:** To understand various procurement models for different product categories.
- **CO3:** To identify key elements of vendor management.
- **CO4:** To understand the different supplier contract in sourcing management.

Pedagogy

The teaching methodology will include lectures using power point, case studies, articles, group discussions and presentations. Interaction during lectures will be encouraged and therefore each student is expected to add valuable inputs during lectures by sharing his/her knowledge.

Students will be required to work on the assignments and individual presentations.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Aggregate Planning and Supply Chain

Course Code	DMS 05
Course Credits	3
Term	IV
Session duration	60 mins each session

Introduction

The course aims at the aggregate planning methodology used to make decisions about production, outsourcing, inventory, and backlogs in a supply chain. We identify the information required to produce an aggregate plan and outline the basic trade-offs that must be made to create an optimal aggregate plan. We also describe how to formulate and solve an aggregate planning problem using Microsoft Excel. We also discuss how demand may be managed to counter predictable variability through the use of price and promotion. By managing supply and demand together, managers can maximize overall profitability of a supply chain.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

- **CO1:** To Identify the decisions that are best solved by aggregate planning. Describe the information needed to produce an aggregate plan.
- **CO2:** To understand the information needed to produce an aggregate plan and explain the basic trade-offs to consider when creating an aggregate plan.
- **CO3:** To Learn how to manage supply and demand to improve synchronization in a supply chain in the face of predictable variability.

Pedagogy

The teaching methodology will include lectures using power point, case studies, articles, group discussions and presentations. Interaction during lectures will be encouraged and therefore each student is expected to add valuable inputs during lectures by sharing his/her knowledge.

Students will be required to work on the assignments and individual presentations.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

	PO1	PO2	PO3	PO4	PO5
CO1	3	3	1	2	-
CO2	3	2	2	-	2
CO3	3	2	3	-	2

Curriculum

Unit-1 Introduction To Aggregate Planning;

1. The Role of Aggregate Planning in supply chain. The Aggregate Planning Problem.
2. Information needed for an Aggregate Plan.
3. Outputs of Aggregate Plan.

Unit-2 Aggregate Planning Strategies:

1. Chase strategy—using capacity as the lever:
2. Flexibility strategy—using utilization as the lever:
3. Level strategy—using inventory as the lever:

The Role of IT in Aggregate Planning, Implementing Aggregate Planning in Practice.

Unit-3 Aggregate Planning using excel.

1. The goal of aggregate planning is to maximize profit.
2. Use of Linear Programming in Aggregate Planning.
3. How to set up excel solver and use it.

How to generate the aggregate plan in excel.

Unit-4 Variability in Supply Chain Management.

1. Understanding Predictable variability in supply chain.
2. How to respond to Predictable variability in supply chain.
3. How to manage supply.
4. How to manage demand

Unit-5 Forecasting Demand in Supply Chain.

1. Understanding what is forecasting and its role in supply chain management.
2. Solving forecasting problem in excel using different methods such as weighted average, exponential smoothing, FITS Time series.

Academic integrity

a. Plagiarism is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

LEGAL STRUCTURE IN ENTREPRENEURSHIP AND START-UPS

Course Code	DME-03
Course Credits	3
Term	IV
Session duration	60 mins each session

Introduction

The goals of this course is to inspire students and help them imbibe an entrepreneurial mind-set. This course examines areas of the law that impact the entrepreneur in the process of starting, growing, operating and financing a business. This course is intended to enable the students acquire a general understanding of some essential laws and develop sufficient understanding so that they appreciate their relevance for business management. The course is intended to provide a basic introduction to the legal and regulatory constructs that impact a start-up business.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	To be able to identify distinguished legal issues & its classification in start-ups and entrepreneurship.
CO2	To develop an understanding of mercantile laws to govern the business enterprises.
CO3	To identify legal issues that arise in the context of selecting an entity for a new venture.

CO1	To be able to identify distinguished legal issues & its classification in start-ups and entrepreneurship.
CO4	To demonstrate critical thinking skills so as to become future-oriented decision makers, problem solvers and innovators.

Pedagogy

COMPETENCY MAPPING AND ASSESSMENT

Course Code	DMH-05
Course Credits	3
Term	V
Session duration	60 mins each session

Introduction:

The entire course will enable the students to develop competency maps, distinguish between traits, skill and competency and discover the professional applications of competency mapping in a business context.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

CO1	Students will explore the history, evolution, and definitions of competency, learning various competency mapping approaches and their application through case studies.
CO2	Students will learn to link HR processes to organizational strategy through competency frameworks, including models like the Iceberg and KIPP Leadership, and practice developing competency maps.
CO3	Students will understand the importance of promoting a competency culture, apply competencies in modern organizations, and use competency maps for selection, performance management, and training.
CO4	Students will develop and implement competency models, such as the Lancaster Model, and integrate them into HR processes through competency mapping, assessment, and development.

Pedagogy

The course will be based on Class room lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear their doubts after the classroom.

Text Books:

1. Sanghi, S., The Handbook of Competency Mapping: understanding, designing and implementing competency models in organizations. SAGE Publications India.
2. Ennis, M. R., Competency models: a review of the literature and the role of the employment and training administration (ETA) (pp. 1-25). Office of Policy Development and Research, Employment and Training Administration, US Department of Labor.

Academic integrity

c. **Plagiarism** is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable at GIMS and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.

c. **Cheating** means using written, verbal or electronic sources of aid during an examination/ quiz/ assignment or providing such assistance to other students (except in cases where it is expressly permitted by the faculty). It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

Strategic Human Resource Management

Course Code	DMH-06
Course Credits	3
Term	V
Session duration	60 mins each session

Introduction:

The entire course will enable the students to understand the strategic role of specific HR systems and identify the relationship of HR strategy with overall corporate strategy.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

CO1	Students will explore the origins and frameworks of strategic HRM, develop and implement HR strategies, and leverage SHRM to enhance organizational capability and competitive advantage.
CO2	Students will master competency frameworks to align HR processes with organizational strategy and develop effective HR competencies.
CO3	Students will examine the role of HR in strategy formulation and integration, addressing HRIS, legal and ethical issues, cultural change, competency management, and organizational restructuring.
CO4	Students will explore contemporary issues in SHRM, including its impact on organizational culture, mergers and acquisitions, strategic international HRM, and technological trends.

Pedagogy

The course will be based on Class room lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear their doubts after the classroom.

MERGER AND ACQUISITIONS

Course Code	DMF-06
Course Credit	3
Term	V
Session duration	60 mins each session

Introduction

The course will enable the students to develop understanding of the economic activity of M&A taking place in the global economy. The course is designed to meet the **applied level of Bloom's taxonomy at specific points, but largely it is designed to meet the level of understanding and application of the taxonomy.**

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business Scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understanding M&A Strategies
CO2	Valuation Techniques
CO3	Due Diligence and Risk Assessment

Pedagogy

The course will be based on Class room lectures, Exercises based on financial derivatives using excel, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Text Books:

1. Mergers and Acquisitions: Strategy, Valuation, Leveraged Buyouts, and Financing, Sheeba Kapil, Kanwal N.Kapil, II Edition, Wiley.
2. Godbole, P., Mergers and Acquisitions and Corporate Restructuring, Vikas Publication, Latest Edition.
3. Ramanujan, S. Mergers and Acquisitions: Issues, Implications and Case Laws in Corporate Restructuring, Tata Mc Graw- Hill, Latest Edition.
4. B. Rajesh Kumar, Mergers & Acquisitions, TATA Mc Graw Hill, Latest Edition.

Reference Book:

5. Mergers, Acquisitions & Corporate Restructuring, Patrick Gaughan, Wiley, Latest Edition.
6. Mergers, Acquisitions and business valuation, Excel books, Ravindhar Vadapalli, Latest Edition

Curriculum

UNIT I: Introduction to Merger and Acquisitions:

Meaning of mergers and acquisitions (M & A), motives behind the M&A, advantages and disadvantages of M &A, types of mergers and steps for successful merger. Strategic Evaluation of M & A Opportunities– selection approaches and criteria modalities of fixing the acquisition price, key steps in the strategic planning of merger, feasibility analysis in respect of cash and stock deals, describes fair value: institutional criteria and special features of acquisition of sick companies Strategizing and Structuring M & A Activity-

UNIT II: Merger Process & Stages

Merger process right from planning the merger till implementation, five stage model, methods of financial mergers and capital budgeting decision

UNIT III: Corporate Restructuring–

Meaning of corporate restructuring, need for corporate restructuring, methods of corporate restructuring. Demergers- Meaning of demerger, characteristics of demerger, structure of demerger and tax implication of demergers. LBOs, MBOs, MLPs and ESOPs- meaning of LBO, MBO, ESOP, governance and mode of purchase in LBO, key motives behind an MBO, types of MLP and ESOP, regulation that govern ESOPs.

UNIT IV: International M& A –

Introduction of international M&A activity, the opportunities and threats, role of M & A in international trade growth, the external advantages in differential products, impact of government policies and political and economic stability on international M&A decisions, recommendation for effective cross-border M&A. Takeover Defenses- types of takeovers, techniques for bidding for a takeover, defenses against takeover bids, regulations and amendments, and guidelines for take over's. Valuation–valuation approaches, basis of valuation, different methods of valuation, valuation of synergy, corporate control and LBO.

UNIT V: Legal and Regulatory Frame work of M&A in India-

Provisions of the Companies Act 2013, relating to M&A, buy back of shares, provisions of SEBI act, 1992 and 1997, provisions relevant to M&A activity in the Income Tax Act. Post- Merger Integration– integration planning, factors in post- merger integration model, post- merger integration model, strategic independence and autonomy, political and cultural aspects in integration, problems in integration and five rules of integration process.

Academic integrity

INTERNATIONAL FINANCE

Course Code	DMF-07
Course Credit	3
Term	V
Session duration	60 mins each session

Introduction

International finance is a specialized field within finance that deals with the management of financial transactions and investments across international borders. A course in international finance focuses on understanding the complexities of global financial markets, currencies, and international financial instruments. The course is designed to meet the **applied level of Bloom's taxonomy at specific points, but largely it is designed to meet the level of understanding and application of the taxonomy.**

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Analyze the impact of exchange rate fluctuations on multinational corporations' financial performance.
CO2	Evaluate the effectiveness of international financial instruments in managing currency and political risks.

CO1	Analyze the impact of exchange rate fluctuations on multinational corporations' financial performance.
CO3	Demonstrate proficiency in applying multinational capital budgeting techniques to assess cross-border investment opportunities.

Pedagogy

The course will be based on Class room lectures, Exercises based on financial derivatives using excel, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Curriculum

UNIT-I: Introduction to International Finance

Financial Globalization and Risk, Global financial Marketplace, Eurocurrency market and LIBOR, Theory of comparative advantage, Globalization process, BOP transactions, accounting, Accounts of BOP, Capital and Financial Accounts, BOP and key macroeconomic variables

UNIT-II: Foreign Exchange rate determination and forecasting

Foreign Exchange market, functions, participants, types of transactions: spot, forward and swap transactions Methods of stating exchange rates, quotations and changes in exchange rates, Exchange rate determination theories, Currency market intervention, disequilibrium, forecasting

UNIT-III: Forward Exchange Market

Forward foreign exchange, premiums and discounts, forward rates vs future spot rates, payoff profile, swaps, forward quotations.

UNIT-IV: Currency Futures and options market

Foreign currency futures, Currency options, Forwards, futures and options compared, Purchasing Power Parity and Interest Parity Prices and Exchange rates, Exchange rate pass-through, Forward rate, Prices, Interest rates and exchange rates in equilibrium

Unit V: Transaction and Translation Exposure

Types of foreign exchange exposure, Hedging, Overview of translation, Translation methods, US translation procedures

Data Visualization using R

Course Code	DMB-06
Course Credit	3
Term	V
Session duration	60 mins each session

Introduction

This course will help you draw meaningful knowledge from the data. The course cover . Single Continuous Variable, Single Discrete Variable, Two Continuous Variable, Two Variable: One Continuous, One Discrete, Two Variables. The course is structured to meet the apply level of bloom's taxonomy at certain points but largely it is designed to meet the level of understanding of the Data mining.

Programme Outcomes

After completing PGDM a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them

PO4	Demonstrate leadership and teamwork skills
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Understanding about the importance of packages in R and how they extend the functionality of the base language.
CO2	Master the art of data visualization through comprehensive techniques, covering single and multiple variables, time series, and categorical data representation.
CO3	Excel in data visualization using ggplot2, mastering diverse plotting techniques and advanced functionalities for insightful analysis
CO4	Interpret classification and prediction methods to make accurate predictions, leading to better decision-making in various industries.
CO5	Develop hands-on proficiency in real-time projects spanning Law of Large Numbers, Financial Statement Analysis, Basketball Free Throws, and World Trends analysis

Pedagogy

Classes will involve a blend of lectures and case discussions. Students will practice various research activities, including: article reviews, presentations, experimental design, theory development, testing and application. Students are expected to contribute to the class discussions based on the course readings and their own experience.

The course will use the following pedagogical tools:

- Lectures
- Case discussion and presentations
- Projects and Assignments
- Related Videos
- Library Work
- Guest Lectures
- Projects / Assignments / Quizzes / Class Participation etc.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning.

Text Book

1. Dr. Mark Gaedener ,Beginning R the Statistical Programming Language , WROX Publication

Reference Books:

1. R.n.prasad , Seema Acharya, Fundamentals Of Business Analytics , Publisher :Wiley Jiawei Han, MichelineKamber,
2. . Data Mining – Concepts and Techniques, Morgan Kaufmann Publishers,
3. William Wesley McKinney ,“Python for Data Analysis by (O’Reilly)

CO4	2	1	2		

Curriculum

Unit-1 Introduction to R

R Studio First Look, Data Type in R, Vector, Factor, List, Matrix, Data Frame, Function in R, Packages in R, Exploring Dataset available in the R Base Package, Dataset available in ggplot2 Package.

Unit-2 Planning for Visualization

Plotting single continuous variable, Plotting single discrete variable, Plotting two continuous variables, Plotting one continuous and one discrete variable, Plotting one continuous and one discrete variable, Plotting two discrete variable, Plotting time series, Scatter Plot, Box Plot by Group, Pie Char, Dot Chart, Strip Chart, Mosaic Chart, Stacked Bar Chart, Time Series

Unit-3 Visualization Using R Base Commands & Visualization Using Lattice Package

Plotting Histogram, Density Plot, Box Plot, Bar Plot, Scatter Plot, Introduction to Lattice Plots, Drawing a Histogram Using lattice Package, Density Plot Using Lattice, Box and Whisker Plot using Lattice, Bar Plot Using Lattice, Scatter Plot Using Lattice, Scatter Plot Matrix Using Lattice, 3D Scatter Plot Using Lattice, Dot and Strip Plots

Unit-4 Visualization Using ggplot2 Package

Introduction to ggplot2 Package, Introduction : Selecting a Diamond, Analyzing Diamonds by Carat Size, Analyzing Diamond by Carat Size, Analyzing Diamond by Carat Size, Analyzing Diamonds by Cut and Color. Data and Aesthetics Layers in ggplot. Geom Layer in ggplot, facets Layer in ggplot, Stats Layer in ggplot, Coord layer in ggplot- Changing Scale, Changing Ratio, Ploar Coordinates and Pie Chart, Axis Transformation

Unit-5 Real time Projects

Law of Large Numbers, Financial Statement Analysis, Basketball Free Throws, World Trends

Academic integrity

a. Plagiarism is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable in GIMS and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.

a. Cheating means using written, verbal or electronic sources of aid during an examination/ quiz/ assignment or providing such assistance to other students (except in cases where it is expressly permitted by the faculty). It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

International Marketing

Course Code	DMIB 05
Course Credits	3
Term	V
Session duration	60 mins each session

Introduction

International marketing is the application of marketing principles by industries in one or more than one country. It is possible for companies to conduct business in almost any country around the world, thanks to the advances in international marketing. The procedure of planning and executing the rates, promotion and distribution of products and services is the same worldwide. In recent times, companies are not restricted to their national borders, but are open for international marketing. With the increasing change in customers' demands, choices, preferences and tastes, the economies are expanding and giving way to more competitive marketing. Thus, organizations need to respond rapidly to the demands of the customers with well-defined marketing strategies.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

- **CO1:** To understand the with the concept and issues of international marketing.
- **CO2:** To analyze the foreign market environment and develop international marketing strategies for a business firm.
- **CO3:** To understand international promotion, advertising, pricing and distribution channels.

Pedagogy

The teaching methodology will include lectures using power point, case studies, articles, group discussions and presentations. Interaction during lectures will be encouraged and therefore each student is expected to add valuable inputs during lectures by sharing his/her knowledge.

Students will be required to work on the assignments and individual presentations.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Unit-1 Introduction to International Marketing & Scanning International Marketing Environment

An overview, The concept of International Marketing, understanding Globalization, Terms in International Marketing, Domestic Marketing Vs International marketing, Evolutionary Process of Global Marketing, LOCAL Marketing, EPRG Concept. Scanning the international Environment, Political, Social, Cultural and legal environment on international marketing decisions. Reasons for Entering International Markets. International Marketing Research.

Unit-2 Entering International Markets

Concept of International Market Entry, Modes of Entry in International Markets, Production in Home country and in Foreign Country, Investment in Entry Mode-International Joint Ventures, Wholly owned Subsidiaries, contract manufacturing, Exporting, licensing.

Unit-3 Segmenting, Targeting and Positioning International Market & International Product and Branding

International market segmentation strategies (i.e. country-based; consumer-based), apply criteria for targeting markets, how gain competitive advantage through positioning. Review the dimensions of product adaption/standardization, international product life cycle, look at the debate about standardization vs. adaptation of products for international markets, country of origin (COO) aspects, product and branding strategies in international markets

Unit-4 International Pricing, Global Placement and Distribution Channel.

Understand the various dimensions of pricing, discuss export pricing strategies, outlining factors determine pricing, learn how to manage price escalation, learn how to manage currency risk, outline the different terms of sales, understand transfer pricing and their importance in international marketing. Outline factors influencing distribution decisions, outline direct and indirect export options and pro and cons of each, outline criteria for selecting distributor, managing international distribution channels, and show the importance of export regulations and enforcement.

Unit-5 International Promotion and Advertising.

Outline the steps to plan a promotional strategy, show how to budget a promotional strategy, understand what is a media strategy, show the various legal restrictions related to ad/promotion, present ways to overcome such legal restrictions, measure the effectiveness of an advertising campaign, understand the AIDA concept and usage for promotion, present the Customer Response Index (CRI), present some international promotional blunders

Academic integrity

- a. **Plagiarism** is the use of or presentation of ideas, works that are not one's own and which

are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable in GIMS and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.

a. Cheating means using written, verbal or electronic sources of aid during an examination/ quiz/ assignment or providing such assistance to other students (except in cases where it is expressly permitted by the faculty). It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at GIMS and will invite penalty as per policies of the Institute.

INDIA'S FOREIGN TRADE

Course Code	DMIB 06
Course Credits	3
Course for	PGDM
Term	V
Session duration	60 mins each session

Introduction

This course focuses on foreign trade practices in India. To enhance the knowledge of the student in the area of the foreign trade, the course will discuss about the current foreign trade in India. It will also focus on the aspect of logistics, cargo and finance. Finally trade policies will be discussed in the course.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

- **CO1:** To Understand broad based knowledge of foreign trade practices in India.

- **CO2:** To Understand foreign trade finance, logistics and cargo.
- **CO3:** To understand foreign trade policies and strategies.

Pedagogy

The teaching methodology will include lectures using power point, case studies, articles, group discussions and presentations. Interaction during lectures will be encouraged and therefore each student is expected to add valuable inputs during lectures by sharing his/her knowledge.

Students will be required to work on the assignments and individual presentations.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Text Books:

1. Export Import Management by Justin Paul and Rajiv Aserkar, 8th edition, Oxford Publishers. (referred as JP in the Course Outline).

Reference Books:

1. India's Foreign Trade by Raj Agrawal Excel Publications.
2. Export Management By P. K Khurana 7TH Edition Galgotia Publications.
3. Export Management by D. C Kapoor Vikas publications.
4. Cases as recommended in the outline.

Curriculum

Unit-1 Introduction

Current scenario of India's Foreign trade; trade analysis & Contribution of exports to country's GDP (since Independence to mid-1970's, 70's to Liberalization & post-liberalization); Key products/commodities for export & import; Major trading partners. Steps involved in setting up an international trading firm; Indian Trade Classification based on Harmonized System of Coding (ITC-HS Codes)

Unit-2 Export Organization & Promotion Boards

Key organizations involved in India's foreign trade (name, locations/branches, key functions): Ministry of Commerce, Department of Revenue, DGFT, ECGC, EPCs, Commodity boards, EXIM bank of India, Export Inspection Council, FIEO, ITPO, DGCIS, MMTC.

Unit-3 Foreign Trade Logistics & Cargo Insurance

Logistics Introduction to global logistics. Different modes of shipments. Different modes of operation of shipping. Different modes of transport. Multi modal transport system. Chartering practice. Containerization FCL / LCL, CFS, ICD. Third party logistic service providers. CHA, FFA, C&FA, Ship operating agent, NVOCC. Cargo Insurance Introduction to need and importance of marine insurance. Basic principles of insurance applicable to cargo clause A, B & C.

Unit-4 Pre & Post Shipment

Finance for Export and Import- Finance options for Export-Import business- pre shipment and post-shipment, effect of Foreign Exchange fluctuations on export/import pricing. Institutional Assistance for Export and Import & Export-Import Business Plan & Strategy; Export Strategy Formulation; Import Strategy (Sourcing Strategy).

Unit-5 Foreign Trade Policy

Govt. objective under Foreign Trade Policy. Structure of Import Policy. ITC (HS) classification of Imports. General policy provisions regarding Imports and exports. Duty exemption / Remission Scheme. EPCG scheme. SEZ, 100% EOU's, EHTP, STP, SEZ, FTZ etc. Deemed Exports. General provisions related to exports & imports. Current Foreign Trade Policy

SUPPLY CHAIN ANALYTICS

Course Code	DMS 06
Course Credits	3
Term	V
Session duration	60 mins each session

Introduction

Supply chains are complex systems involving multiple businesses and organizations with different goals and objectives. Many different analytical methods and techniques are used by researchers and practitioners alike to better design and manage their supply chains. This course introduces the primary methods and tools that are used in study and practice of supply chains. We focus on the application of these methods, not necessarily the theoretical underpinnings.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

- **CO1:** To understand the different supply chain optimization techniques
- **CO2:** To understand the concept of Modelling and its use in Supply chain.
- **CO3:** To understand the use of Linear Programming technique to support decision-making processes in supply chain management.

Pedagogy

The teaching methodology will include lectures using power point, case studies, articles, group discussions and presentations. Interaction during lectures will be encouraged and therefore each student is expected to add valuable inputs during lectures by sharing his/her knowledge. This is a hands-on course. Students will use spreadsheets extensively to apply these techniques and approaches in case studies drawn from actual supply chains.

Students will be required to work on the assignments and individual presentations.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

CO1	3	1	2	-	2
CO2	3	1	3	-	2
CO3	3	3	3	1	2

Curriculum

Unit-1 Introduction to Supply Chain Analytics.

Introduction to Modelling. Using Analytic Solver Platform, Steps in implementing an LP Model in Spreadsheet, Using Excel Built in Solver, Make Vs buy Decision Problem. Linear programming and sensitivity analysis- Supply Chain Modelling

Unit-2 Facility Location and allocation Optimization

Understanding the importance of Facility location. Optimization of facility location. Practical problem.

Unit-3 Vehicle Routing Problem (VRP)

What do we mean by "optimal routes" for a VRP? Find optimal routes for multiple vehicles visiting a set of locations, Determining the optimal solution to VRP.

Unit-4 Transshipment problem

Introduction to Transshipment problem, Understanding supply & demand in Transshipment, Route capacities or route minimums, unacceptable routes. Practical Problem of Transshipment.

Unit-5 Non-linear programming

Introduction to non-linear programming. Introductions to Inventory models. Inventory Models practical problem.

Academic integrity

a. Plagiarism is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable in GIMS and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.

Maritime Logistics & Documentation

Course Code	DMS-07
Course Credit	3
Term	V
Session duration	60 mins each session

Introduction:

The entire course will introduce the students with maritime logistics, insurance choice of shipping services and documentations.

Programme Outcomes

After completing PGDM a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate values, ethics, leadership and teamwork.
PO5	Higher employability quotient

Course Outcomes:

After taking this course a student shall be able to;

CO1	Gain a working knowledge of ship operations, port management, supply services and the chartering process.
CO2	Understand vessel types and design over view including loading and discharge.

CO1	Gain a working knowledge of ship operations, port management, supply services and the chartering process.
CO3	Identify the essential elements of documentation associated with maritime trade.
CO4	Understand the documentation & functioning of export and import management.

Pedagogy

This pedagogical approach combines theoretical knowledge with practical application, promotes critical thinking, and ensures that students are well-prepared to excel in the field of maritime logistics and documentation. The course will be based on class room lectures, exercise based on class discussions, case studied.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning.

Text Books:

1. Edmund J. Gubbins, Shipping Industry (Transportation Studies) Rutledge, 1986.
2. Martin Stopford, Maritime Economics, Rutledge, 2008.
3. Alan E.Branch, Elements of Shipping, Rutledge, 2007.

Reference Books:

1. Peter Lorange, Shipping Strategy: Innovating for Success, Rutledge, 2007.
2. Lane C.Kendall, the Business of Shipping, Cornell Maritime Press, 2001

Curriculum

Unit-1 Maritime Logistics

Concept, objectives, Importance and relevance to global marketing and Supply chain management- Coastal and Ocean transportation-World Sea-borne Transport-Global Sea Routes and the trade volume-Characteristics of shipping transport-Types of Ships-Container, Roll-on/roll-off (ro-ro) vessels, General cargo ships, Bulk carriers, Tankers, etc.-Busiest Sea routes: East-West and North-South and Intra Region-International Maritime Organization (IMO): Formation and functions-Regulations concerning dangerous and polluting cargoes, including the class structure.

Unit-2 Chartering Principles and Practices

Types of Charters- Voyage, Time and Bare Boat charters- Freight Determination and Determinants- Conference System vs Competitive System-Freight structure and practice-Rate Dynamics-Multi-modal Transport system- Technological developments in ocean transportation: Size, Tracking, Speed and Security. Arrangement for shipment of Cargo - Role of intermediaries Functions and services of clearing and forwarding agents, freight brokers, stevedores, shipping agents and surveyors- House and Terminal Stuffing- Port: Types of port – Major Port of India and world- Structural and cargo handling facilities -Warehousing and storage in ports - Demurrage - Loading and unloading in warehouses- Organization, functions and Performance out runs chart of Ministry of Shipping.

Unit-3 Maritime Insurance

Maritime Insurance: Cargo insurance-Marine Insurance-Institute cargo clauses-specific policy- Open policy-procedure for cargo insurance-Procedure for marine insurance claims-Necessary documents for filing claim.

Unit-4 Choice of a Shipping Service

Choice of a Shipping Service: Factors influencing: Reliable Worldwide Network, One-stop for Total Logistics Solutions, Committed to High Quality Services, Transparency, Positive Approach, Highly Trained, Motivated and Result Oriented Staff, Competitive Rates, Excellent Team Work, Provide alternatives/options to the client.

Unit-5 Export Procedure and documentation

Export Procedure and documentation: Offer and receipt of orders - Shipment procedure -Banking Procedure Export Documentation - Framework - Standardized pre-shipment Export Documents – Commercial and Regulatory Documents - Export credit instruments and procedures: Letters of credit and types - Documents required for export credit. Export credit insurance-services of Export Credit and Guarantee Corporation in export credit insurance-Specific Policy and Small Exporters Policy-Guarantees-Procedure for availing credit insurance and necessary documents-Multi modal transport-Procedure and documentation–Central Excise and Customs clearance of export cargo- Procedure and documents.

Academic integrity

a. Plagiarism is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Cheating is strictly prohibited at GIMS and will invite penalties as per policies of the Institute.

Transportation and Revenue Management in Supply Chain

Course Code	DMS 08
Course Credits	3
Term	V
Session duration	60 mins each session

Introduction

This course we discuss the role of transportation within a supply chain and identify trade-offs that need to be considered when making transportation decisions. Our goal is to enable managers to make transportation strategy and design, planning, and operational decisions with an understanding of all the important pros and cons of their choices. Given that most supply chain assets are fixed but demand fluctuates, the matching of supply and demand is a constant challenge. We will discuss how managers may use pricing as a lever to better match supply and demand and grow revenue derived from supply chain assets.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

- **CO1:** To Understand the role of transportation in a supply chain.
- **CO2:** To Identify the relative strengths and weaknesses of various transportation modes and network design options.
- **CO3:** To Understand the role of revenue management in a supply chain.
- **CO4:** To identify conditions under which revenue management tactics can be effective.

Pedagogy

The teaching methodology will include lectures using power point, case studies, articles, group discussions and presentations. Interaction during lectures will be encouraged and therefore each student is expected to add valuable inputs during lectures by sharing his/her knowledge.

Students will be required to work on the assignments and individual presentations.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

Curriculum

Unit-1 Introduction to transportation Management

The role of transportation in Supply Chain, Modes of Transportation and their performance characteristics, Transportation infrastructure and policies

Unit-2 Designing and Planning Transportation Network

Design option for transportation network, Trade off in transportation Design.

Unit-3 The design option in a transportation network

The design of a transportation network, Three basic questions need to be considered when designing a transportation network between two stages of a supply chain, Selecting a Transportation Network, Practical question of selecting transportation network.

Unit-4 Introduction to Pricing and revenue management.

The role of pricing and revenue management in a supply chain, wing sections, pricing and revenue management for multiple customer segments, revenue management for perishable assets.

Unit-5 Revenue management

Revenue management for seasonal demands, revenue management for bulk and spot contracts, using pricing and revenue management in practice.

ENTREPRENEURIAL MARKETING

Course Code	DME-05
Course Credits	3
Course	PGDM
Term	V

Introduction

To develop frameworks and conceptual tools for students to explore new venture, opportunities, understand the business model of startups, analyze problems to develop the optimal marketing strategy for products and services in a digital-first world. The main objective of the course is to provide a fundamental understanding of the underlying dimensions of creating, measuring, analyzing and managing the marketing function in a new business venture. The course will help the students to become familiar with the concept of an entrepreneurial firm working from a marketing perspective.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	To understand the basic concepts and components of entrepreneurial marketing.
CO2	To analyze the various forms of entrepreneurial marketing and formulation of various marketing strategies.
CO3	To develop an understanding of entrepreneurial distribution channels for product branding.

Pedagogy

The course will be based on Class room lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

Readings

The following books are being referred for the course. However, it is expected that the participants will make use of other materials which will be prescribed from time to time. Students are advised to read newspapers and business magazines of their choice on a regular basis to augment the classroom learning. Students will also be given with the video lecture links of the teaching faculty to clear the doubts after the classroom.

ENTREPRENEURIAL FINANCE

Course Code	DME-06
Course Credits	3
Term	V
Session duration	60 mins each session

Introduction

The course is designed to develop an understanding of the dynamic challenges faced by entrepreneurial ventures and start-ups in securing finance at different stages of growth. Entrepreneurial Finance is primarily designed for students who plan to get involved with a new venture at some point in their career as a founder, early employee, advisor or investor. However, the course is also appropriate for students interested in gaining a broader view of the financing landscape for young firms, going beyond the basics of venture capital and angel financing to look at venture debt, bank finance, corporate venture capital and receivables financing.

Programme Outcomes

After completing PGDM Programme a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate leadership, values, ethics and teamwork
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	To analyze a firm's working capital management and explain its relation to growth
CO2	To determine the amount and source of external capital for an entrepreneurial firm, including venture capital, angel financing, venture debt, crowdfunding, as well as traditional funding sources such as bank loans.
CO3	To understand the computation of various investment decisions and analyze its implications on startups.
CO4	To describe liquidity choices for private firms, and the timing of exit decisions.

Pedagogy

The course will be based on Class room lectures, Exercises based on class-discussions, cases, and group-project. Students would have to work individually as well as in groups. Students are expected to read the relevant chapters from the book, relevant videos from the suggested channel and any other reading material provided before they come to the class.

BUSINESS ETHICS & CORPORATE SOCIAL RESPONSIBILITY

Course Code	DM 601
Course Credits	3
Term	VI
Session duration	60 mins each session

Introduction

The objective of this course is to impart knowledge about business ethics and corporate social responsibility, emphasizing the importance of ethical decision-making and the role of businesses in contributing to society.

Programme Outcomes

After completing PGDM a student should be able to;

PO1	Understand fundamentals of all functional areas of management
PO2	Apply the management knowledge to take better decisions for various given business scenarios
PO3	Critically understand the business problems and find right management tool to solve them
PO4	Demonstrate values, ethics, leadership and teamwork.
PO5	Higher employability quotient

Course Outcomes

After taking this course a student shall be able to;

CO1	Develop a deep understanding of business ethics, including ethical theories and principles.
CO2	Analyze and apply ethical frameworks to real-world business scenarios.
CO3	Evaluate the role and impact of corporate social responsibility in business strategy.

CO and PO Mapping

3 - Highly Mapped

2 - Medium Mapped

1 - Low Mapping

	PO1	PO2	PO3	PO4	PO5
CO1	1	1	-	-	1
CO2	2	2	1	-	1
CO3	2	3	2	-	1

Curriculum

UNIT: 1 Values –

Importance, Sources of Value Systems, Types, Business Ethics – Nature, importance, factor influence the Business Ethics, Need, Ethical theories & Principles, Applications of Ethical Framework to Business Dilemmas.

UNIT: 2 The Ethical Value System –

Universalism, Utilitarianism, Distributive Justice, Social Contracts, Individual Freedom of Choice, Professional Codes; Culture and Ethics – Ethical Values in different Cultures.

UNIT: 3 Business Law and Ethics –

Relationship between Law and Ethics, Other Bodies in enforcing Ethical Business Behavior, Impact of Laws on Business Ethics; Social Responsibilities of Business – Environmental Protection, Fair Trade Practices, fulfilling all National obligations under various Laws, Safeguarding Health and well-being of Customers.

UNIT: 4 Corporate social Responsibilities:

Issues, need, corporate governance code, transparency & disclosure, role of auditors, board of directors and shareholders; Global issues of CSR, accounting and regulatory framework, corporate scams, committees in India and abroad, corporate social responsibility.

Session Plan

The following session plan would be adhered to by the faculty:

Academic integrity

a. **Plagiarism** is the use of or presentation of ideas, works that are not one's own and which are not common knowledge, without granting credit to the originator. Plagiarism is unacceptable in GIMS and will invite penalty. Type and extent of penalty will be at the discretion of the concerned faculty.

a. **Cheating** means using written, verbal or electronic sources of aid during an examination/ quiz/ assignment or providing such assistance to other students (except in cases where it is expressly permitted by the faculty). It also includes providing false data or references/list of sources which either do not exist or have not been used, having another individual write your paper or assignment or purchasing a paper for one's own submission. Cheating is strictly prohibited at GIMS and will invite penalties as per policies of the Institute.

Detailed Guidelines for Dissertation Project Report (DM-603)

Post Graduate Diploma in Management (PGDM)

GIMS-Greater Noida

(Effective from Academic Session 2022-24)

PLOT NO. 7, KNOWLEDGE PARK-II, GREATER NOIDA-201306, (U.P.), INDIA

As a part of the requirements to be fulfilled for the award of the post graduate diploma in management (PGDM), GIMS-Greater Noida, students are expected to undergo a Dissertation Research Project and present a Dissertation Research Project on the same in their Sixth trimester. This document contains details of expected practices with respect to the Dissertation Research Project submission. Particular Research adjustments may be necessary to the notice of the faculty and only on their approval it should be incorporated in the Dissertation Research Project report. Students must consult their faculty members for the design and content of your Dissertation Research Project report.

PART-A

General Framework of the Dissertation Research Project Report

The following outline is indicative of the overall structure of a Dissertation Research Project.

- | | |
|---|-------------------|
| ● Title Page | Page Nos. |
| ● Student's Declaration | |
| ● Certificates (if any) | Roman Nos. |
| ● Acknowledgements | |
| ● Table of contents | |
| ● List of tables and figures | |
| ● Abstract | |
| ● CHAPTER-1: Introduction | Nos. 1, 2, 3..... |
| ● CHAPTER-2: Literature Review | |
| ● CHAPTER-3: Research Methodology | |
| ● CHAPTER-4: Data Analysis & Interpretation | |
| ● CHAPTER-5: Findings | |
| ● CHAPTER-6: Conclusions, Suggestions and Recommendations | |
| ● References | |
| ● Appendices (Questionnaire, Copy of Balance Sheet and other statements etc.) | |

Length of the Dissertation Research Work

The total length of the Dissertation Research Project will be minimum 100 pages and maximum 300 pages. This length will be exclusive of title and contents page, figures, tables, appendices and references.

Plagiarism

Plagiarism, that is, the willful representation of another person's work, without the acknowledgment or the deliberate and unacknowledged incorporation in a student's work of material derived from the work (published or otherwise) of another, is UNACCEPTABLE and will incur the penalty of outright failure.

Planning Your Work

You are advised to begin working on your Dissertation Research Project immediately after V-trimester. You should see your supervisor or mentor on a regular basis- at least twice every week in the beginning. Start working as early as possible. Starting to work at an early stage will enable your supervisor to see what direction your work is going in, where your weaknesses are and give you constructive advice and you will gain confidence from the feedback.

The Role of Supervisor

- Suggest some general areas of research for consideration and wherever possible, any examples of current research relevant to the topic.
- Discuss possible direction for the study and advice on aims and objective
- Be available for regular meetings
- Examine written work and provide constructive criticism.
- Make students aware of inadequate progress or any other facts which could impede the completion of a successful piece of work.
- Responsibilities of Students
- It is your responsibility to make appointments on a regular basis. If you are facing difficulty in arranging appointments you must contact the program head.
- Provide written work for your supervisor to comment on: maintain your own progress.
- Submit your written work in advance of your appointment in order that
- your supervisor has time to offer you constructive criticism.

- Comply with the regulations as detailed in this document.

SECTION-B

Specific Aspects of the Dissertation Research Project Synopsis

A Synopsis should provide an overview of your study in all its aspects. It should be around 8 to 10 pages and should answer the following questions.

- What does this research set out to do and why?
- How did it seek to do it?
- What do these suggest?
- What conclusions are reached?
- What are the implications of these?

Acknowledgements

In this section you should express thanks to those who assisted you in your research. These should be kept to a minimum and include academic supervisors and people who participated in the fieldwork, any funding bodies and so on.

Introduction

In the introduction you should introduce the reader to the background of the study and the nature of the problem being considered. It should therefore set the study in context explaining why this study is important, highlighting significant issues, problems and ideas. The basic purpose of this section is to provide the reader a basic idea of the subject area of the Dissertation Research Project and its contents.

- *Background of the Problem*
- *Statement of the Problem*
- *Purpose of the Study*
- *Theoretical Framework*
- *Importance of the Study*
- *Scope of the Study*
- *Summary*

Literature Review

In the Dissertation Research Project students are expected to provide critical review of the existing literature (published and unpublished) on the research area being investigated. Any

article you read should be referenced appropriately. Nevertheless, your review should indicate that you have studied existing and recent work in the field. The literature review should be:

- Relevant
- Up-to-date
- Comprehensive

-

Methodology

The purpose of this chapter is to indicate what you actually did in your research so that your reader may evaluate the design procedure and findings of your study. The methodology section should be well-structured, written in concise, matter-of-fact manner and must cover the following area:

- *Introduction of Research Methodology*
- *Research Design*
- *Hypothesis Framing*
- *Research Questions*
- *Population and Sample of the Study*
- *Conceptual Framework of Research*
- *Data Analysis Techniques*
- *Assumption of the Study*
- *Limitation of the Study*

Presentation and analysis data

In the presentation of data, you are to present the major findings of your research in a summarized form and the details of analyses which have been performed. The content and style depend on the nature of the research method chosen, but in the case of both quantitative and qualitative studies, the objective is to present the data collected to answer the research questions. You are required to seek guidance from your supervisor for preparing this section.

- Presentation and analysis of qualitative research.
- Presentation of data is mainly descriptive and this is usually presented in a chronological order.
- Analysis of data is conducted through the identification of themes. The research tools in qualitative research include open-ended descriptions, transcriptions of interviews, essays and observations. These produce a mass of data which sometimes can be difficult to shift. A useful way to process this data is to keep the research question(s) in mind, to read through the data a couple of times until particular issues or themes

- present themselves. These can be suggestive of a structure for presenting the descriptive data.
- Evidence is usually in the form of quotations from the subjects being studied, discussions of people involved, illustrations, photographs-the variations are unlimited.
 - You may find that there is evidence of difference of opinions. Include variations in opinion and describe poles of belief. These add richness to qualitative research.

Presentation and analysis of quantitative research

- As a preliminary to working out results, any test given must be scored, data inputted into the appropriate computer program and additional material gained from the sample must be sorted out. This is often purely mechanical work, and it takes time but must be done accurately.
- The data presented must not be in their raw form. Only summarized data should be presented. The only time you would ever describe data on individual subjects is when you have done a case study.
- In this section, the task is to summarize data meaningfully, through the use of descriptive statistics. Include mean scores, medians, ranges, standard deviations, correlation coefficients and so on.
- Visual presentation is very important in quantitative research, graphs, tables, histograms, bar graphs are simple ways in which to present condensed data but they are also very effective.

Discussion of results and conclusions

- This chapter should draw together all the issues of the research and link back to the aim and objectives which were outlined in the introduction and methodology. Have the aims set at the beginning been met? If not, why not?
- Evaluate how your findings bear on issues or points raised in the literature review.
- What are the implications arising from the findings? Be careful with your generalizations and your interpretations. Recommendations should be based on evidence.
- Do you have any suggestions for future research in this area?

SECTION-C

Presentation Layout

General Text

- The text should be 1.5 spaced using printing on single sides of the pages and duly numbered. However, new chapters, sections, etc. should start from new pages.
- Font: Times New Roman, Size 12, Justified (both left and right) alignment
- In-text emphasis: Use italics or bold typeface
- Paragraphs: 0.5” First line indentation; 1.5 line spacing with 12-point space after paragraph
- Page Margins: Top: 1”; Bottom: 1”; Inside: 1.5” Outside: 1” (Mirrored layout)
- Page numbers:

Centered at the bottom of the page

- Roman number (I, ii, iii.....) should be used from the pages preceding table of contents (excluding the title page)
- The main body of the text (where the introduction) commences on Page 1
- The pages included in Appendices/Annexure are to be numbered in roman numerals (I, ii, iii.....)

Headings

- Chapter Heading Size 16 in bold typeface
- Sub-Heading size 14 in bold typeface
- Main Chapter headings in block capitals
- Chapter headings left justified at the top of a new page
- All other headings justified and followed by a single line space
- Use sub-headings together with a numbering system used in this document thus giving structure to your work.

Quotations

- Single line-spacing
- Indented left and right
- Justified left and right

- Must include author name, date and page number referring to the parent text
 - Table, Figures etc.
 - Must be numbered accordingly
 - Must have title at the top and key underneath
 - The table title must be set in sentence case (only first letter in capital)
-
- Only the Table index number should be in bold. Rest of the title should be in plain text.

Typing and Proofreading

Always proofread your copies for good grammar and presentation before handing your work to your supervising faculty. Special attention should be made to the final draft of your report.

References

Full details of all the books and journal articles cited or referenced throughout the Research Project should be included in this chapter. A reader should be able to identify the exact source and refer to it directly. References should be complete in all respects and arranged in alphabetical order. APA Style (7th ed.)

Text reference should appear as follows:

(Smith, 2009, p. 23)

Journal references should be listed as follows:

Kennedy, A. K., Winter, V. R., & Corbin, M. M. (2019). Physical education class and body image perception: Are they related? *Physical Educator*, 76(2), 467-484. <https://doi.org/10.18666/tpe-2019-v76-i2-8766>

Books should be referred as follows:

Text Book:(Kaakinen et al., 2015, p. 57)

e-Book: Rhode, D. L. (2002). *Divorce, American style*. University of California Press.

<http://www.escholarship.org/editions/view?docId=kt9z09q84w;brand=ucpress>

Appendices

The appendices should include selective, supplementary material which is distracting when placed in the main body text. Only material which is necessary for a full understanding of your study should be included. These include important forms, questionnaires or interview schedules, description of equipment or settings, tables and lists of data supportive of the study.

Binding

Two hard bound copies and one soft copy of the Research Project report are to be submitted. The hardbound copies should have the contents of the title page inscribed/pasted on them. It is the students' responsibility to organize the binding and make sure that the copies are ready before the submission date.

Acknowledgement

I am using this opportunity to express my gratitude to everyone who supported me throughout the course of this Post Graduate Diploma in Management project. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice during the project work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to the dissertation report.

I express my warm thanks to Mr./Dr. [NAME] and all the people who provided me with the facilities being required and conducive conditions for my PGDM dissertation project report.

Thank you,
