

Report: FDP on “AI-Driven Financial Analytics: Sustainability | Risk Assessment | Ethical Considerations”

Date: June 10–14, 2025

Mode: Online

Overview

The five-day Faculty Development Programme (FDP) on “*AI-Driven Financial Analytics: Sustainability | Risk Assessment | Ethical Considerations*” was organized to explore the evolving role of Artificial Intelligence in the financial domain. The programme focused on how AI is transforming financial decision-making, risk management, and sustainable investment, while emphasizing the ethical challenges in AI-driven systems.

Core Themes

- AI applications in financial data analysis and modeling
- Machine learning and predictive analytics for risk assessment
- ESG analytics and sustainability-focused finance
- Ethical and regulatory implications of AI in finance
- Emerging trends and innovations in AI-based financial systems

Session Highlights

- **AI-Driven Hedging Strategies** – Dr. Sonali Yadav
- **AI and Sustainability** – Dr. Deepti Sharma
- **Ethical AI in Sustainable Finance** – Dr. Shahrukh Saleem
- **ESG Integration in Corporate Strategy** – Mr. Vatsalya Chaturvedi & Mr. Tarun Ahuja
- **Green Finance and Sustainable Banking** – Mr. Ashutosh Kalra

The sessions effectively blended theoretical insights with practical demonstrations, fostering interaction between academia and industry.

Feedback Summary

The FDP received highly positive feedback across all sessions for content quality, relevance, and delivery. Participants particularly appreciated:

- Clear articulation and practical orientation of concepts
- Real-world applications of AI in sustainability and finance
- Balanced discussions on ethics, governance, and technology

Key Takeaways

- Strong satisfaction with the quality and structure of sessions
- Enhanced understanding of AI’s practical applications in finance
- Increased awareness of ethical and sustainable financial practices
- Integration of interdisciplinary perspectives across finance, technology, and policy
