

Report: MDP on Interventions in the Field of HRM – Trends, Tools, and Ethical Considerations

Date: May 13–17, 2025

Mode: Hybrid

Overview

A five-day Management Development Programme (MDP) on “*AI Interventions in the Field of HRM: Trends, Tools, and Ethical Considerations*” was conducted to explore the role of Artificial Intelligence in Human Resource Management. The programme offered a blend of academic insights and industry perspectives, addressing AI fundamentals, predictive analytics, ethical implications, and emerging innovations in AI-driven HR practices.

Key Learning Themes

- Fundamentals of AI in HRM
- Predictive analytics for HR decision-making
- AI-based HR analytics tools and applications
- Ethical and legal considerations in AI-enabled HRM
- Future trends at the intersection of AI and HR

Feedback Summary

The MDP received highly positive feedback across parameters:

- **Learning Experience:** 91% found sessions enriching and valuable
- **Content Relevance:** 88% agreed topics aligned with industry needs
- **Speaker Delivery:** 86% rated sessions engaging and insightful
- **Session Interactivity:** 83% appreciated interactive discussions
- **Logistics & Coordination:** 79% satisfied with arrangements

Highlights of Sessions

- *Generative AI in Management* – Dr. Aman Kumar, IIM Ranchi
- *AI-Driven HR Analytics & Decision Making* – Dr. Ajay Kr. Chauhan, Founder, researchshiksha.com
- *Ethical, Legal & Future Perspectives in AI-Driven HRM* – Dr. Shikha Bhardwaj, IIM Sambalpur
- *AI in HR: Fundamentals and Applications* – Dr. Radha Yadav, IIM Ranchi
