About Us

Cosmo Club is the official International Business Club of GNIOT Institute of Management Studies, bridging academic learning with the dynamic world of global business. It provides a platform where diverse cultures, global perspectives, and strategic thinking come together to shape future leaders.

The club promotes global awareness, cross-cultural understanding, and analytical skills through expert sessions, case studies, simulations, and industry interactions, offering practical insights into international markets.

By fostering innovation and a global mindset, Cosmo Club equips students with key skills in negotiation, communication, leadership, and decision-making, preparing them to succeed in global business environments.

With a vision to develop globally competent professionals, Cosmo Club empowers students to think beyond borders and transform global opportunities into impactful strategies.

Vision

To become a globally recognised and sustainable management school that contributes to management education, research, and innovation by developing

- (a) socially responsible ethical business leaders and
- (b) centres of excellence across all functional areas of management.

MISSION

- M1 : Developing a dynamic, outcome-based teaching-learning process that cultivates critical thinking, leadership, and industry readiness.
- M2 : Creating an ecosystem that nurtures research, innovation, and entrepreneurship.
- M3 : Developing globally aware, ethical, and socially responsible professionals.

PEO's

PEO 1 Ethical career Progression and Social Engagement

PEO 2 Continuous Learning and Research bent

PEO 3 Responsible human beings

PO's

PO 1 Understand fundamentals of all functional areas of management

PO 2 Apply the management knowledge to take better decision for various given business scenarios

PO 3 Critically understand the business problems and find right management tool to solve them

PO 4 Demonstrate values, ethics, leadership and teamwork

PO 5 Higher employability quotient

The Guiding *Voice*

It is a privilege to see Cosmo Club shaping globally aware and future-ready professionals. In today's interconnected world, such platforms are vital in preparing students for international business challenges.

The club reflects our commitment to excellence and innovation, encouraging students to think globally and act strategically. I appreciate the dedication of the students and faculty behind its success.

I encourage all students to actively participate and make the most of these opportunities.

Wishing Cosmo Club continued success.

**Mr. Swadesh
Kumar Singh**
CEO

GIMS

The Guiding Voice

It is a matter of great pride to see the continued efforts of Cosmo Club, our International Business Club, in fostering a global perspective among students. In today's interconnected world, developing an understanding of international business practices is essential for future leaders.

Cosmo Club has consistently provided a platform for students to enhance their knowledge, engage in meaningful discussions, and broaden their outlook beyond borders.

I appreciate the dedication and enthusiasm of the students and faculty members who contribute to the success of this club. This newsletter is a reflection of their hard work and commitment.

Wishing Cosmo Club continued success in its future endeavors.

**Dr. Bhupender
Kumar Som**

Director

GIMS

The Guiding Voice

It is a pleasure to extend my greetings to all readers of the Cosmo Club newsletter. As the International Business Club, Cosmo Club serves as a dynamic platform where global ideas and perspectives come together.

In today's fast-changing business world, a global outlook is essential. The club plays a key role in developing this mindset by promoting analytical thinking, cultural awareness, and practical exposure through its initiatives.

I appreciate the dedication of the students and faculty whose efforts make this platform impactful. This newsletter reflects their commitment to learning and excellence.

I encourage all students to actively engage and benefit from these opportunities.

Wishing Cosmo Club continued success.

Dr. Ruchi Rayat

Executive Director

GIMS

The Guiding Voice

The world today is more interconnected — and more uncertain — than at any point in living memory. Supply chains realign overnight, currencies swing on a single announcement, and entire industries reinvent themselves between two academic semesters.

Our mission at GIMS is to prepare exactly that kind of manager. Through rigorous coursework, live industry projects, global case studies, and our growing network of strategic partners,

This newsletter is your window into that journey. Within these pages, you will find student achievements, faculty insights, industry interactions, alumni voices, and the small, steady victories that together make up an institution.

The world is one family. Let us teach, learn, and lead like it.

**Dr. Rakesh
Roshan Pant**

Basmati Rice Exports: Growth and Emerging Challenges

India's Strong Growth in Basmati

India has become the global leader in basmati rice, contributing around 70–75% of world exports. Production has increased due to better seeds, improved farming practices, and government support. Key institutions like APEDA have strengthened exports through quality control, certification, and global market access

Challenges from Gulf Conflict & Hormuz Strait Crisis

Recent tensions in the Gulf region and instability in the Strait of Hormuz have created major issues:

- Shipping delays and route disruptions
- Increased freight and insurance costs
- Payment and banking risks (especially with Iran)
- Demand uncertainty in key Gulf markets
- Supply chain and port congestion

Since the Gulf is a major market, these risks significantly affect Indian exporters.

Key Basmati Varieties & R&D Support

Popular varieties include Pusa Basmati 1121, 1509, 1718, and traditional basmati.

Research by Indian Council of Agricultural Research and IARI has driven this growth through:

- High-yield and disease-resistant seeds
- Climate-resilient farming technique

Improved grain quality for exports

India's basmati sector has achieved remarkable growth, but geopolitical tensions pose serious risk

EEPC India and Promotion of Engineering Exports: Current Scenario

The Engineering Export Promotion Council of India plays an important role in supporting India's engineering exports. In 2026, its efforts are clearly focused on helping Indian businesses grow beyond domestic markets, especially by supporting MSMEs and improving their ability to compete globally.

One of the main ways EEPC supports exporters is by helping them participate in global trade fairs. In 2026, India is part of major international exhibitions like Hannover Messe 2026, Middle East Energy 2026, and FEIMEC 2026. These events give Indian companies a chance to present their products, understand global demand, and directly connect with buyers from different countries. For many businesses, especially smaller ones, this exposure is a big step toward entering new markets.

For example, at Hannover Messe 2026, EEPC coordinated a strong India pavilion where more than 100 Indian engineering companies, including many MSMEs, showcased products in automation, machinery, and industrial components. EEPC also facilitated B2B meetings with European buyers, leading to export inquiries and long-term business partnerships. Similarly, at Middle East Energy 2026 in Dubai, Indian firms displayed power equipment such as transformers, cables, and switchgear, while EEPC arranged buyer–seller interactions with importers from the Gulf and African regions. At FEIMEC 2026 in Brazil, EEPC helped Indian exporters enter the Latin American market by organizing participation, supporting networking, and guiding companies on local standards and certifications.

Apart from exhibitions, EEPC also organizes buyer–seller meets and trade delegations. These platforms allow Indian exporters to interact directly with foreign buyers, which makes a big difference in building trust and securing orders. Events like Bharat Electricity Summit 2026 bring together industry players from different countries and create real business opportunities. This is particularly helpful for MSMEs that may not otherwise get access to global networks.

International Logistics and Shipping Operations: Impact of the Iran-US Conflict

International logistics plays a vital role in ensuring smooth global trade, but recent geopolitical tensions-particularly the conflict between Iran and the United States have significantly disrupted shipping operations. The Strait of Hormuz, a critical maritime chokepoint, handles nearly 20% of global oil shipments, making it central to international supply chains.

Due to the ongoing conflict, shipping traffic through this route has drastically reduced, with blockades, military actions, and security risks forcing vessels to reroute or halt operations. This has increased transportation costs, delivery delays, and insurance premiums, thereby affecting global logistics efficiency.

For India, the impact is particularly severe. As a country heavily dependent on imported crude oil, much of which passes through the Strait of Hormuz, disruptions have led to rising fuel prices, inflation, and supply uncertainty.

Moreover, the Indian government is actively reviewing policies to mitigate supply chain disruptions and protect economic stability.

Iran-US conflict highlights how geopolitical risks can destabilize international logistics, emphasizing the need for diversified trade routes and resilient supply chain strategies in the global economy.

Cross-Cultural Management & Global Workforce

Cross-cultural management involves effectively managing a diverse global workforce by understanding and adapting to differences in culture, communication styles, values, and work behaviors. For organizations like Google, Microsoft, and Tata Consultancy Services, working in several countries with culturally diverse teams is not merely an HR function; it is a strategic requirement in today's hyper-globalized and digitalized business environment. Language barriers, cultural misunderstandings, differences in leadership style and coordination difficulties due to different time zones can create challenges for organizations which can affect productivity and teamwork. When well managed, cultural diversity becomes a powerful asset, promoting innovation, creativity, better decision-making, and a deeper understanding of global markets.

Companies can develop cultural intelligence, promote inclusive leadership and provide cross-cultural training and digital collaboration tools to bridge these gaps and foster cohesive teams. In conclusion, cross-cultural management is very important in enhancing organizational performance and providing a significant competitive edge. Companies that can effectively leverage diversity are in a better position to succeed in the global marketplace.

Effect of War on Insurance Companies

War affects not only countries and people but also industries like insurance. During wars, insurance companies face heavy financial losses because damage to buildings, ships, goods, and businesses leads to a large number of claims. For example, during the Russia-Ukraine War, global insurers reported losses of around \$1.3 billion in a single quarter.

War also increases insurance costs. In high-risk regions such as the Black Sea, ship insurance premiums rose sharply, making protection more expensive for customers. Since war creates uncertainty, insurance companies often increase premiums, limit coverage, or stop providing insurance in dangerous areas.

In addition, wars affect financial markets, reducing the profits insurers earn from investments. To manage such risks, companies introduce stricter policies and special “war exclusion clauses.”

In conclusion, war creates major challenges for insurance companies through higher claims, financial pressure, and uncertainty, while also pushing them to improve risk management and become more prepared for future crises.

Trading Smarter, Not Just Harder: The Case for Sustainable Trade

International trade is no longer just about profits and fast deliveries — it is also about responsibility. Every product moving across borders leaves an environmental and social impact through carbon emissions, resource depletion, and labor practices. Today, sustainability has become a business necessity, especially with policies like the European Union's Carbon Border Adjustment Mechanism, which places carbon-related costs on imports.

For future managers and businesses, sustainable trade means choosing ethical suppliers, reducing waste, optimizing logistics, and measuring environmental impact alongside revenue. Companies like Patagonia and IKEA have shown that sustainability can strengthen customer trust and long-term growth. Trade is global, and so is our responsibility to make it smarter and more sustainable.

AI and Digital Transformation in International Business

Artificial Intelligence (AI) is rapidly transforming international business and global trade. Companies are now using AI-powered tools for demand forecasting, customer service, inventory management, and international logistics. From automated warehouses to smart shipping systems, digital transformation is helping businesses reduce costs and improve efficiency. Global companies are also using AI to analyze consumer behavior and make faster business decisions. In international trade, technologies like Blockchain and AI improve transparency, reduce documentation errors, and enhance supply chain visibility.

Countries worldwide are investing heavily in digital infrastructure to stay competitive in global markets. As businesses move toward automation and data-driven operations, AI is becoming a major competitive advantage. The future of international business will depend on how effectively organizations adopt technology, innovation, and digital transformation in a rapidly changing global economy.

IB Conclave 2025

Trade, Technology and Transformation : The Future of Global Business

The IB Conclave on Trade, Technology, and Transformation brings together industry experts, academicians, and future business leaders to explore how global markets are evolving in a rapidly changing world. The conclave focuses on the intersection of international trade policies, emerging technologies like AI and digital platforms, and the transformative shifts shaping modern businesses.

Through insightful discussions, case studies, and expert sessions, participants gain a deeper understanding of global trends, innovation strategies, and cross-border opportunities. This event serves as a dynamic platform to bridge knowledge with real-world application, preparing students to navigate the future of global business with confidence and strategic vision.

EVENTS

Expert Session 2025

International Trends in International Trade and Reforms

An expert session on Emerging Trends in International Trade & Reforms was conducted at GIMS for the PGDM Batch 2025-27, featuring distinguished speaker Sh. Anil Bhatia, Ex-Director (ICT & Projects). The session provided in-depth insights into the changing landscape of global trade, key policy reforms, and the growing impact of digitalization and technology on international business

It also highlighted current challenges such as supply chain disruptions, geopolitical tensions, and evolving trade regulations. The interactive discussion enabled students to connect theoretical concepts with real-world practices, enriching their understanding of global markets and preparing them for future opportunities in international trade.

EVENTS

Expert Session 2026

Expert Session on Business Operation Strategies, Quality Standards and ESG

GIMS Greater Noida organized an insightful expert session on “Business Operation Strategies, Quality Standards and ESG” for the PGDM Batch 2025–27 on 22nd April 2026. The session was delivered by Dr. Rajesh Kumar Rai, who shared valuable industry insights on operational excellence, global quality benchmarks, and the growing importance of Environmental, Social, and Governance (ESG) practices in modern business management.

The session provided students with practical exposure to contemporary business operations and highlighted how organizations can achieve sustainable growth through quality-driven strategies and responsible corporate practices. The interactive discussion enriched students' understanding of industry expectations and emerging global business trends

EVENTS

Global Trade Practical Challenge

This role-play event simulated a real-world international business environment where participants took on key roles such as Export Manager, Logistics Manager, and Finance Manager to execute a global trade operation. Each role carried specific responsibilities—while the Export Manager handled client communication and order processing, the Logistics Manager ensured efficient transportation, documentation, and timely delivery, and the Finance Manager managed pricing, payments, and financial risk. The activity encouraged teamwork, decision-making, and practical understanding of export procedures, highlighting how coordination among different departments is essential for successful international trade. Overall, the event provided hands-on exposure to the challenges and dynamics of global business operations.
