Q.5. (a) Give SWOT analysis of “Future of driving is driver less car.”

OR

(b) Elaborate the Statement “Network Connecting device play a crucial role for information propagation.”

SECTION-C

Case Study: Gannet, Inc

Like The New York Times, Gannett, the publisher of USA Today and 81 other daily newspapers, has adopted “a pay for content” approach for their Internet portals. Although Craig A. Dubow, the former CEO of Gannett admitted that they are looking at “different prices for different content models,” and sustainability of any model is an important determination, the company is convinced that “consumers value our content and are absolutely willing to pay for it”. In addition to charging readers for content, Gannett is actively engaged in providing businesses with advertising linked to these sites, creating additional revenue streams. Gannett’s on-line solicitations mention their ability to present advertising messages “across a wide-range of platforms”, including print, television stations, and Web sites “that reach 52 million unique users monthly”. Dubow stated: “Central to these efforts is the idea that consumers will always seek relevant content and advertisers need to connect to those consumers”.

Recognizing the potential of digital media, Gannett acquired social media outlet Ripple6 in 2008, and a year latter established a digital media network by incorporating such offerings as MomsLikeMe.com, HighSchoolSports.net, Metromix.com featuring local entertainment needs, and BNQT focusing on action and extreme sports, to their digital mix. Along with their Web portals, Point Roll, Ripple6 and Shop Local, these sites were designed to support the company’s local news offering and promote local advertising, thus adding “localism” as a third pillar to Gannett’s revenue growth. In addition, they have HistoryBeat.com to serve people interested in local history into a potential consumer base.

Taking the growth of digital media, including social media, and both revenue objectives into consideration, Gannett has launched their “It’s All Within Reach” campaign. In announcing the campaign, Dubow stated “In today’s changing media landscape, Gannett is in a unique position to help businesses reach, tailor and direct their messages to specific audiences on many different platforms”.

Social media plays a substantial part in Gannett’s strategic vision, claiming that 2009 was “a breakout year for digital content—from apps to tablets to social media.” CEO Dubow said “We are putting a significant amount of time and energy into social media to further engage with our viewers and our readers”. In addition to supporting their Internet and local media offerings, Gannett also uses social media, especially Facebook and Twitter, to deliver local content and keep their audiences informed of emergency situations.

Q.6. Attempt all parts of the following:

(2×15=30)

6(a) “Gannet has utilized advanced web capabilities to enhance its profits”. Comment on these capabilities assuming you are prescribing some recommendations to it.

6(b) “Social media can be utilized to compete in publishing digital content”. What is the role of new mobile apps to make a reach to existing and new customers?
