GNIOT Institute of Management Studies – PGDM (Batch 2021-23)**(TRIMESTER – II) END TERM EXAMINATION, JANUARY - 2022****RESEARCH METHODOLOGY****[Time: 2 Hours 30 Minutes]****[Maximum Marks: 100]****INSTRUCTIONS:**

- (i) There are **THREE** sections in this question paper.
- (ii) Attempt questions from each section as per the directions.
- (iii) Make suitable assumptions wherever necessary.

Multiple Choose Question:

1. In order to pursue the research, which of the following is priorly required?
 - a) Developing a research design
 - b) Formulating a research question**
 - c) Deciding about the data analysis procedure
 - d) Formulating a research hypothesis
2. What are the conditions in which Type-I error occurs?
 - a) The null hypotheses get accepted even if it is false
 - b) The null hypotheses get rejected even if it is true**
 - c) Both the null hypotheses as well as alternative hypotheses are rejected
 - d) None of the above
3. Research is
 - a) Searching again and again
 - b) Finding solution to any problem
 - c) Working in a scientific way to search for truth of any problem**
 - d) None of the above
4. In the process of conducting research ‘Formulation of Hypothesis’ is followed by
 - a) Statement of Objectives
 - b) Analysis of Data
 - c) Selection of Research Tools**
 - d) Collection of Data
5. An image, perception or concept that is capable of measurement is called_____.
 - a) Scale
 - b) Hypothesis
 - c) Type
 - d) Variable**
6. The main problem in questionnaire is
 - a) Accessible to Diverse Respondent
 - b) Greater Anonymity
 - c) Shows an inability of respondent to provide information**
 - d) None of these
7. Cluster sampling, stratified sampling and systematic sampling are types of
 - a) Direct sampling

- b) Indirect sampling
 - c) Random sampling**
 - d) Non random sampling
8. The chi-square test is:
- a) A mean
 - b) A multi-question tests
 - c) A statistical mistake
 - d) A statistic**
9. In SPSS, what is the "Data Viewer"?
- a) A table summarizing the frequencies of data for one variable
 - b) A spreadsheet into which data can be entered**
 - c) A dialog box that allows you to choose a statistical test
 - d) A screen in which variables can be defined and labelled
10. A comprehensive full Report of the research process is called
- a) Thesis**
 - b) Summary Report
 - c) Abstract
 - d) Article

SECTION-A
(Short Answer Type Questions, do not exceed 100 words)

Q.1. Attempt all parts and write short notes on the following:

(10×3=30)

- (a) Applied Research.
- (b) Obligation of the Researcher.
- (c) Criteria of Good Research Design.
- (d) Sources of secondary data.
- (e) Schedule & Questionnaire.
- (f) Steps in defining research problem.
- (g) Multistage sampling.
- (h) Dichotomous questions.
- (i) Difference between Type-I error and Type-II error.
- (j) ANOVA

SECTION-B
(Long Answer Type Questions)

Attempt all questions of the following:

(4×10=40)

Q.2. (a) "Research is much concerned with proper fact finding, analysis and evaluation." Do you agree with the statement? Give reasons in support of your evaluation.

OR

(b) Enumerate the different methods of collecting data. Which one is the most suitable for conducting an enquiry regarding welfare programme in India. Explain its merits and demerits.

Q.3. (a) Illustrate various types of measuring scale. Explain the construction of Likert scale for measuring the consumption of the scale.

OR

(b) Distinguish between

- i. Mall intercept survey and door to door interview;
- ii. Longitudinal study and cross sectional study

Q.4. (a) “Data visualization is very important in research reports.” Do you agree with the statement? Explain various charts and graphs frequently used in popular reports.

OR

(b) How is data coding is different from data editing? Support your reasoning with suitable examples for both the activities.

Q.5. (a). Differentiate between null hypothesis and alternate hypothesis. Describe reason of type-I and type-II error.

OR

(b) Mention the different types of report, particularly pointing out the difference between a technical report and a popular report.

SECTION-C **(Case study)**

National Do Not Call Registry

Citizens’ annoyance with phone calls from sales people prompted Congress to pass law setting up a National Do Not Call Registry. The register was soon flooded with requests to have phone numbers removed from telemarketers’ lists. By law, salespeople may not call numbers listed on this registry. The law makes exceptions for charities and researchers. However, a recent poll suggests that even though phone calls from researchers may be legal, they are not always well received.

In late 2005, Harris Interactive conducted an Internet survey in which almost 2,000 adults answered questions about the National Do Not Call Registry. About three-quarters of the respondents said they had signed up for the registry, and a majority (61 percent) said they had since received “far less” contact from telemarketers. In addition, 70% said that since registering, they had been contacted by someone who was doing a poll or survey and wanted them to participate. But apparently respondents weren’t sure whether this practice was acceptable. Only one fourth (24 percent) of respondents said they knew that researchers “are allowed to call”, and over half (63 percent) weren’t sure about researchers rights under the law.

Q.6. Attempt all parts of the following:

(2×15=30)

Case Questions

6(a) As a researcher how would you address people's doubts about whether pollsters may contact households listed on the do not call registry?

6(b) Was an online survey the best medium for a poll on this subject? What were some pros and cons of conducting this poll online?
