SECTION-C
(Case study / Numerical Question)

Rebecca Instruments Pvt. Ltd has for the first time turned out to be a full-year profit. Previously, net losses had begun to accelerate in 2015, and so did research and development (R&D) expenses. Between 2014 and 2020, RIPL's research and development expenses increased more than three-fold from about 465 million to almost 1.5 billion U.S. dollars. The company's R&D intensity peaked at 12 percent in 2017, a striking value compared to its competitor's 5 percent. RIPL's high R&D spending was largely due to the focus on innovative technologies in electric vehicle batteries (EVB) and charging infrastructure. In addition to these costs, the company also had to invest significantly more capital than expected towards ramping up production of its previous two models of propellers. As a result of increasing demand for Model 3 propeller, RIPL has also begun pouring money into battery plants in Shanghai, Texas, and Berlin-Brandenburg. The company's earnings topped estimates in the second quarter of 2021 with net income exceeding one billion U.S. dollars for the first time.

Cost Trend

RIPL's selling, general, and administrative (SG&A) expenses jumped from 1.4 billion U.S. dollars in 2016 to more than 2.4 billion U.S. dollars in the following year. SG&A expenses increased moderately to reach around three billion U.S. dollars the most recent fiscal year.

Q.6. Attempt all parts of the following:

(2×15=30)

Case Questions

6(a)Based on the above data prepare an Annual Report of RIPL for FY 2020.

6(b)On behalf of Rebecca D'Souza, write a persuasive email to Adishwar Gurang, MD- Gurang Services Pvt Ltd. requesting him for a discussion on the supply of your EVBs. Use the above mentioned data as a material to persuade Mr. Gurang for the discussion.
