OR

(b) Explain the concepts of:

(i) International logistics

(ii) Buff whip effect in SCM

SECTION-C

Q.7. Attempt all parts of the following:

(2×15=30)

Ace Dairies gives a home delivery services for milk, dairy products and a range of related goods. Roger Smitheram has run the dairy for the past twelve years. His product is a combination of goods (the items he delivers) and services (the delivery and associated jobs he does for customer). At the heart of operations is information systems which contain full details of all Roger's 500 customers including their regular orders, special orders, where to deliver, how they pay and so on. Every day the system calculates the likely sales of all products in two days time. Roger adds some margin of safety allows for likely variations and passes his order to Unigate Dairy in Totnes in Devon (about 150 km away). This Unigate depot acts as a wholesaler for milkmen in Wales and the southwest of England. The following evening it delivers to a holding depot in Camborne and then takes Roger's goods 10 km to a cold store in Hayle. At 5.30 the following morning Roger collects the order from his cold store and starts delivery to customer. This normally takes until 1.30 in the afternoon, but on Friday he spends more time collecting money and often finishes after 5.00 pm. There are several specific problems facing Ace Dairies. There is; for example some variation in daily demand so Roger has to carry spare stock. He cannot carry too much as dairy products have a short life and anything not delivered quickly is thrown away. Roger aims at keeping this waste down to 2 percent of sales. There are also problems maintaining a service during holidays or when Unigate has difficulties with their deliveries. Perhaps Rogers' main concern is maintaining his sales over the long term. Demand for doorstep deliveries is declining as people buy more milk at supermarkets.

The number of milkmen in Hayle has declined from ten in 1987 to three in 2002. Most of Roger's customers have been with him for many years, but he generates new customers by canvassing, delivering leaflets, special offers, carrying a range of other product and so on.

7(a). Where does Ace Dairies fit into this? What specific activities from the logistics in Ace Dairies?

7(b). What are the main problems that Ace Dairies has with logistics?
