Subject Code: DMITBA-03  
Paper ID: 24441

**GNIOT Institute of Management Studies – PGDM (Batch 2021-23)**  
**(TRIMESTER – IV) END TERM EXAMINATION, SEPTEMBER - 2022**  
**Data Visualization using Business Analytics Tool**

[Time: 2 Hours 30 Minutes]

[Maximum Marks: 100]

**INSTRUCTIONS:**

- (i) There are **THREE** sections in this question paper.
- (ii) Attempt questions from each section as per the directions.
- (iii) Make suitable assumptions wherever necessary.

**SECTION-A**  
**(Short Answer Type Questions, do not exceed 100 words)**

**Q.1. Attempt all parts of the following:**

**(10×3=30)**

- (a) Define Heatmap.
- (b) Differentiate prediction and forecasting.
- (c) Importance of clustering.
- (d) What is measure and dimension in tableau?
- (e) Differentiate between time series and cross section data.
- (f) Explain the important feature for good visualization ?
- (g) What do you mean by correlation? Mention 4 uses of it...
- (h) Trend Vs Seasonality.
- (i) Differentiate scatter plot and joint plot
- (j) Suppose in a dataset there are 50 rows then how many cluster can we create for this?

**SECTION-B**  
**(Long Answer Type Questions)**

**Attempt all questions of the following:**

**(4×10=40)**

**Q.2.** (a) Discuss the importance of business analytics.

**OR**

(b) Explain all kind of data type supported by tableau.

**Q.3.** (a) write a note on mark card and dual axis in tableau

**OR**

(b) Explain different types of join in tableau?

**Q.4.** (a) In view of data Presentation explain the importance of Tableau dashboard.

**OR**

(b) Explain in brief about tableau parameter.

**Q.5.** (a). Mention the Most common characteristics used in descriptive statistics? What do you mean by outlier explain in detail?

**OR**

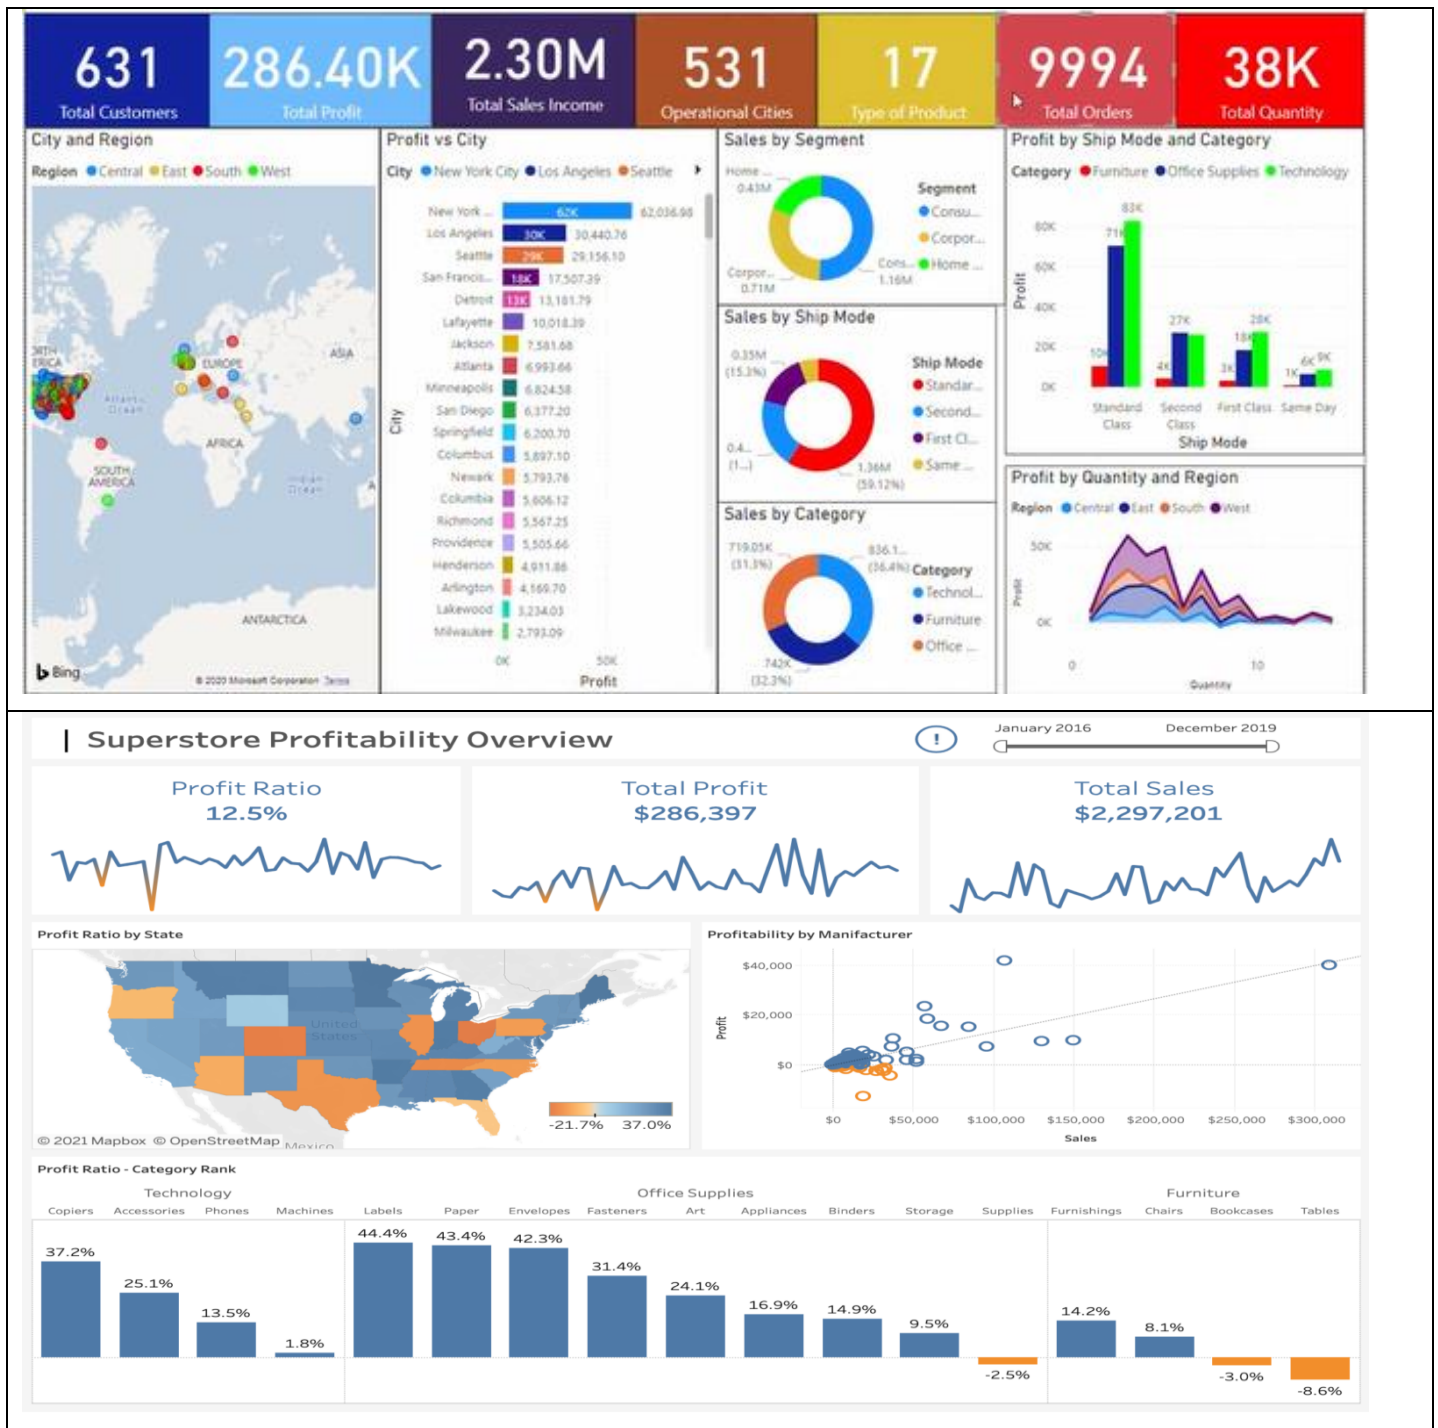

(b) Differentiate heat map and tree map along with its use case.

## SECTION-C

Q.6. Attempt all parts of the following:

(2×15=30)

6 A) Following are the two dashboard built by someone to analyse the sample super store. What are the different insights do you visualize after looking at these dashboard.

6 B) Suppose a data scientist has to work on Black Friday Sales Prediction problem statement and because of this he has decided to build his multiple linear regression model for this. Everyone knows that before building a model one has to perform the exploratory data analysis so, he decided to do this using data visualization. Kindly suggest what are the different plot he can use for the followings:

- Finding out the outlier and skewness
- To see the correlation between Sales and other variables
- What to do if he wants to see multiple sheets together?
- How can he see top 10 sales amount here.
- How can he forecast future sales in tableau?
