GNIOT Institute of Management Studies – PGDM (Batch 2021-23)

(TRIMESTER – IV) END TERM EXAMINATION, SEPTEMBER - 2022

INNOVATION AND PRODUCT MANAGEMENT

[Time: 2 Hours 30 Minutes]

[Maximum Marks: 100]

INSTRUCTIONS:

- (i) There are **THREE** sections in this question paper.
- (ii) Attempt questions from each section as per the directions.
- (iii) Make suitable assumptions wherever necessary.

SECTION-A

(Short Answer Type Questions, do not exceed 100 words)

Q.1. Attempt all parts of the following:

(10×3=30)

- (a) Differentiate between products and services.
- (b) Define incremental innovation in context of cars.
- (c) What are the various kinds of services a marketer can offer?
- (d) Would you prefer a matrix organization structure or a functional organisation structure for a new company? Give reasons for your answer.
- (e) Elaborate the benefits and drawbacks of “over the wall” model.
- (f) How can bridging agencies help in technology transfer?
- (g) How is network type of innovation helpful to a company?
- (h) Is licensing your technology to others a good idea? Weigh its pros and cons.
- (i) How are “product use tests” done? Explain with example.
- (j) Explain the benefits of matrix organisational structure.

SECTION-B

(Long Answer Type Questions)

Attempt all questions of the following:

(4×10=40)

Q.2. (a) Elaborate the types of innovation with examples.

OR

(b) Design a framework for management of innovation.

Q.3. (a) Contrast the activity stage model and conversion process model. Which model according to you is better for new product development?

OR

(b) Explain theory of diffusion of innovation with reference to metaverse.

Q.4. (a) What issues does India face as an economy in terms of research and development?

OR

(b) Seek out strategic alliances: they are essential to growth and provide resistance to bigger competition.” Comment on this statement in the light of various strategic alliances available to a company.

Q.5. (a) As a product manager, you are asked to test your product before commercialisation. What techniques you have at your disposal to test your prototype?

OR

(b) What criteria can you set as a research manager to evaluate your R&D projects?

SECTION-C

Q.6. Attempt all parts of the following:

(2×15=30)

Harvard University and Amazon Web Services (AWS) have launched a strategic alliance to advance fundamental research and innovation in quantum networking. This effort provides significant funding for faculty-led research at Harvard and will build capacity for student recruitment, training, outreach and workforce development in this key emerging technology field. The initiative focuses on driving rapid progress toward specific research aims in quantum networking at the Harvard Quantum Initiative (HQI).

“By working together, academia and industry can accelerate discovery and technological progress,” said Harvard Provost Alan M. Garber. “Through this alliance with AWS, we will bring scientific scholarship and education to bear on some of the most exciting frontiers in quantum science. Together we will advance the goals of the Harvard Quantum Initiative, an interfaculty initiative that exemplifies the rewards of collaboration across different scientific domains.”

“Quantum networking is an emerging space with promise to help tackle challenges of growing importance to our world, such as secure communication and powerful quantum computing clusters,” said Antia Lamas-Linares, quantum networking lead at AWS. “The collaborative initiative between AWS and Harvard will harness top research talent to explore quantum networking today and establish a framework to develop the quantum workforce of the future.”

Mikhail Lukin, Professor of Physics and codirector of HQI remarked “There is a shortage of qualified quantum-educated workforce, and it’s not just physicists but engineers and even people involved in running these businesses,” added Lukin. We’re in a unique position to contribute,” he explained. “Essentially, all major quantum research centers in the U.S. and abroad have several faculty members and group leaders who have been educated at Harvard.”

6(a) Describe the advantages that this union will provide to both parties.

6(b) What additional strategic alliances might Harvard or AWS choose?
