SECTION-C

Q.6. Attempt all parts of the following:

(2×15=30)

Delhivery is an Indian logistics and e-commerce supply chain company that came into existence in 2011. Since its formation, the company has fulfilled more than 1 billion orders all over the country. It has a team of more than 66000 people that manage 86 gateways, 21 automated sort centres, and 80+ fulfilment centres. It offers reliable, flexible, and secure supply chains to its customers at the lowest possible cost. It serves more than 21000 active customers from the retail, lifestyle, FMCG, automotive, electronics, consumer durables, and manufacturing sectors. Delhivery also emphasizes extensive reach, low rate of returns, delivering service quality, and easy integration with sales channels. Delhivery Company offers a wide variety of logistics services to its clients. Let us discuss this in detail and know which service to use at what time. Express Parcel Delivery services, as the name suggests, is the quickest parcel delivery service across 17000 pin codes in India. It can deliver more than 10 kilograms of goods to the farthest location within 48-96 hours. Through the Delhivery Direct facility, the customers can send and receive the parcels at home. It offers same-day, time-defined, address-specific, and returns management services. It also provides technical services like fraud detection, flexible payment, real-time monitoring, and consignee address validation. In addition, bulk/large order delivery, HAZMAT, and high-value product delivery.

TRUCKLOAD FREIGHT

Truckload freight brokerage platform Orion is a medium that connects the shippers with the suppliers and fleet owners. They can post their bidding and truckload freight requirements by becoming registered agents and fleet owners on the platform. It provides technology-based services like financial transactions, real-time tracking, and document management. It offers its services to the internal, corporate, agriculture, transportation, and commodity sectors. It also operates a digital freight brokerage subsidiary Road piper Technologies Pvt. Ltd. The company manages the pricing policies and load-matching techniques from all across the country. The acquisition helps strengthen the supplier's efficiency and increase the truckload capacity.

PARTIAL TRUCKLOAD FREIGHT

Delhivery offers a subsidiary of the truckload freight service called the partial truckload freight services. It focuses on the B2B express segment and assists the shared line haul operations. It caters to the regular and seasonal requirements of customers all over the country.

CROSS BORDER SERVICES

Cross Border services is a delivery service that focuses on delivering parcels to the global markets. Starfleet, an international shipping service, enables the company to integrate global networks on a single platform. It follows the string of pearls strategy and provides single-window visibility for express and global freight shippers.

It is also partners with leading global express companies that assist in expanding the reach and coverage of the business. Delhivery combines warehousing, operations, infrastructure, and transportation with business intelligence, deep data science, and network and technology.

SUPPLY CHAIN SERVICES

The company under this service provides air cargo, door-to-door and port-to-port parcel delivery facilities to national and international customers. It has an integrated network of trackers, regulators, technicians, clearance experts, and a customer support team.

Delhivery provides the E2E services, also known as Exchange to Exchange supply chain services. It helps in providing integrated and comprehensive multi-channel order fulfilment solutions. These solutions assist in improving the speed, reliability, and cost-efficiency of the orders delivered to the customers. It also focuses on retail, pharmaceuticals, electronics, automotive, healthcare, consumer products, industrial product sectors.

Recently, the company has acquired Primaseller Inc to expand the delivery structure to the D2C industry. It has helped many e-commerce brands, Omni channel retailers, and online & offline marketers can connect directly with the customers. It offers value-added services like network design, inventory placement, decision support system, Multi-Tenant Operations, and End-to-End Visibility. It also provides sample solutions for distribution, returns management, On-demand fulfilment, Vendor Managed Inventory, and Temperature controlled Freight solutions.

Q.6. (a) What types of warehouse can assist Delhivery support in its business growth? Give your explanations on the warehouse choices.

Q.6. (b) List down ten key issues and challenges Delhivery may face in delivering its services *from warehousing point of view*.
