GNIOT Institute of Management Studies – PGDM (Batch 2021-23)**(TRIMESTER – V) END TERM EXAMINATION, DECEMBER - 2022****PROJECT MANAGEMENT AND EVALUATION****[Time: 2 Hours 30 Minutes]****[Maximum Marks: 100]****INSTRUCTIONS:**

- (i) There are **THREE** sections in this question paper.
- (ii) Attempt questions from each section as per the directions.
- (iii) Make suitable assumptions wherever necessary.

SECTION-A**(Short Answer Type Questions, do not exceed 100 words)****Q.1. Attempt all parts of the following:****(10×3=30)**

- (a) List the key roles of a project manager.
- (b) Briefly explain the characteristics that increase uncertainty in projects.
- (c) Explain scope creep in a project.
- (d) Distinguish between dynamism and equivocality in a project.
- (e) Illustrate the reasons that even the great projects with strong starts can stumble and fall into cycle of doubt.
- (f) Explain chaos in a project.
- (g) Illustrate a megaproject.
- (h) Outline the benefits of SPV (special purpose vehicle) for project finance.
- (i) Briefly discuss “Earned Value Management.”
- (j) Discuss the key steps of cost estimation.

SECTION-B**(Long Answer Type Questions)****Attempt all the following questions:****(4×10=40)**

Q.2. (a) You along with your friends at PGDM identified a lucrative project to set up a petrol pump near the educational (institutions) hub. Explain capital budgeting and carry out the entire capital budgeting process to give a go ahead and implement the project.

OR

- (b) Despite meticulous planning and risk-management processes, you, as a project manager, may encounter events such as the failure of workers to show up at a site, the bankruptcy of a key vendor, a contradiction in the guidelines provided by the engineering consultant or changes in customers’ requirement. Discuss in detail how successful project managers cope with this challenge by stating appropriate examples.

Q.3. (a) The project managers get surprised when a new project gets derailed despite having the knowledge that the projects are always new and unique. Assess the things that they do not even know that they do not know. To what extent these surprises which are lurking in every project, just waiting to emerge, surprise and derail plans, are inevitable? What could the project managers do better when these situations arise?

OR

- (b) Your family has identified a project to set up a departmental store at Jagat Farm. Do the project analysis. Describe the best practices for conducting a feasibility study and identify the key components of feasibility study to be included in your “Project Report.”

Q.4. (a) Many projects are launched with high praise and promise but lose traction and momentum during project delivery, once the real work is underway. In this context, discuss the dynamics of the cycle of doubt. What are the triggers that contribute to the cycle of doubt?

OR

- (b) Marketing teams always think about brand building and how to create an atmosphere around a product or service. But the branding process can be used in projects as well. Describe how the branding process is used internally to build excitement for projects among the project team.

Q.5. (a) Megaprojects are important contributors to numerous sectors, including healthcare, defence, mining, telecommunications, transport, energy and water infrastructure, sporting events, science, and manufacturing, etc. Describe the rules for managing such large, complex projects. Also state the steps to avoid scope creep.

OR

(b) At the end of a week, the progress of task X is measured, and it is found to be 35% complete. The actual cost of the work which involves other variables such as equipment and materials is Rs 25 million by the end of the week. Assess if the project is on track when task X has a budget of Rs 125 million and is expected to be 50% complete by the end of the week.

SECTION-C

Q.6. Attempt all parts of the following:

(2×15=30)

At Vistara Airlines, a crew member on recruitment goes through a training project for which the information on the activities is as follows:

Activity	1-2	1-3	2-4	2-5	3-4	4-6	5-6	6-7
Duration (Days)	6	4	5	3	6	8	4	3

6(a) Draw a network. Calculate the earliest start (ES), earliest finish (EF), latest start (LS), and latest finish (LF) times of each of the activities.

6(b) Determine the float on each node and also the critical path.
