The Indian consumer durables market is broadly segregated into urban and rural markets and is attracting marketers from across the world. The sector comprises a huge middle class, relatively large affluent class and a small economically disadvantaged class. The sector includes consumer electricals such as fans, kitchen and cooking appliances, lighting devices, as well as white goods such as washing machines, televisions, refrigerators, and air conditioners.

According to a number of consumer durable businesses, rural India presents the next significant growth potential for the industry, driven by increased penetration. The government's effort to electrify rural areas has improved power supply during the past few years in tier 3/4 towns and villages, paving the way for the use of electrical products.
