GNIOT Institute of Management Studies – PGDM (Batch 2022-24)

(TRIMESTER – III) END TERM EXAMINATION, APRIL - 2023

Marketing Analysis for Business Decisions

[Time: 2 Hours 30 Minutes]

[Maximum Marks: 100]

INSTRUCTIONS:

- (i) There are **THREE** sections in this question paper.
- (ii) Attempt questions from each section as per the directions.
- (iii) Make suitable assumptions wherever necessary.

SECTION-A

(Short Answer Type Questions, do not exceed 100 words)

Q.1. Attempt all parts of the following:

(10×3=30)

- (a) Differentiate between the regression and classification model.
- (b) What are the advantages and disadvantages of marketing analytics?
- (c) Differentiate between Primary Vs Secondary data.
- (d) What is churn rate?
- (e) Differentiate between discrete and continuous data.
- (f) Define collaborative filtering in recommender system?
- (g) Application of Text Mining.
- (h) What is the 3rd step in CRISP-DM?
- (i) Suppose in a dataset there are 200 rows then how many clusters can we create for this?
- (j) Supervised Vs Unsupervised learning.

SECTION-B

(Long Answer Type Questions)

Attempt all questions of the following:

(4×10=40)
