(C)	4	CO - 1
(D)	4	CO - 1
(E)	4	CO - 1

SECTION-B**Attempt all questions out of the following: (Long Answer Type Questions)**

Q. No	Marks	CO
2 (A)	6	CO – 2
2 (A)	6	CO – 2
2 (B)	6	CO – 2
2 (B)	6	CO – 2
3 (A)	6	CO – 2
3 (A)	6	CO – 2
3 (B)	6	CO – 2
3 (B)	6	CO – 2

SECTION-C**Attempt all parts of the following: (Caselet / Numerical)**

Q.4	Marks	CO
4 (A)	8	CO – 3
4 (B)	8	CO - 3

Course Outcome Wise Marks Distribution

- (e) What are the levels of channels in distribution management?

SECTION-B

(Long Answer Type Questions)

Q.2. Attempt all questions of the following

(4×6=24)

- (a) Describe the various kinds of distribution channels and suggest which channel is most suitable for a chocolate brand.

OR

- (a) Compare and contrast the various elements of the promotion mix with examples.
- (b) Design a perceptual map for the automobile industry (Passenger car segment).

OR

- (b) Write short notes on the following:
 - (i) Customer retention
 - (ii) Sociological model

Q.3. (a) What insights does Maslow's Hierarchy theory provide to marketers. Use examples to illustrate your arguments.

OR

- (a) Explain various reference groups a customer may seek while buying a pair of sneakers.

OR

- (b) Promotion and distribution go hand in hand. Justify the statement with suitable examples with reference to any industry of your choice.

OR

- (b) Zomato announced plans to roll out Instant—a 10-minute food delivery service. Orders were fulfilled via small hubs or stations operating mini assembly kitchens for popular dishes of restaurant partners, offering a limited set of food and beverage options to customers. But later on Zomato scrapped its 10-minute delivery service a year after piloting it in Bengaluru, Gurugram and in some areas of Delhi. Highlight the key challenges Zomato might have faced which led to the shut down of Zomato Instant.

SECTION-C

Q.4. Attempt all parts of the following:

(2×8=16)

Consumers are becoming health conscious and would like to consume foods which are balanced, and have all the required nutrients in proper quantities. These ingredients are cholesterol, salt, sugar, fiber, calories and additives. The consumers are not only concerned about such goods for themselves, but also their families. A survey was made by a company to find out the food attitudes of consumers. This was done to find out how products could be designed, advertised and positioned to attract health conscious consumers. The survey of food attitudes was carried out as food-related items. These attitudes were food conscious, cooking attitudes, brand loyalty, instant foods, price sensitivity, value, etc. The analysis revealed that basically customers could be classified into three categories.

Category I: Older Consumers

These were health conscious older people, who because of medical consideration, had little choice, and these people were concerned about sugar, salt, greasy foods, etc. They ate meals regularly, at regular timings, and took great precautions for their food. They used branded products, and played very safe in eating outside and not consuming food not prescribed for them.

Category II: Buyers of Convenience Food

These are younger consumers keeping busy mostly outside the house, who skip lunch or breakfast. They rely on convenience food and fast foods. They have a hectic lifestyle. They are upwardly mobile, use ready to eat and frozen foods. They work mostly outside the house and are pressed for time. They have an irregular schedule for meals. They also dislike cooking and want to utilize time for leisure and other activities rather than for cooking. They are not very concerned about a balanced diet, and would have greasy burgers or any other fast foods to suit their convenience. They can also be categorized under impulse buyers, rather than careful shoppers. If the product has appeal, it will be bought, and the price and brand name are not the main considerations.

Category III: Cooking Own Food

They like to cook their own food and get involved in the kitchen. They love to make an assortment of dishes. This is also done to cut costs. They like to buy their own groceries and cooking stuff, and do not want to waste money on fancy packings. They do not try new products, i.e., they are not innovators, but try to be a late majority, and buy a thing, when it has established itself in the market. They tend to have a big family, and have to economize, as well.

4(a) Keeping in mind different customer segments, how would you promote your product to your target market if you are an organic food brand targeting elite class customers?

4(b) Suggest the ideal distribution channel for your product range if the situation is as given in the question no. 4(a).
