

GNIOT Institute of Management Studies – PGDM (Batch 2023-25)
(TRIMESTER –II) END TERM EXAMINATION, JANUARY -2024

Basic Python for Managers

[Time: 3 Hours]

[Maximum Marks: 60]

Following are the course outcomes of the subject: - SUBJECT NAME

CO	Course Outcome (CO)
CO1	Python, including installation, basic syntax, variables, data types, operators, and type conversion, enabling them to write basic Python programs.
CO2	Proficient in designing and implementing control flow structures and functions in Python to solve complex problems.
CO3	Select and apply appropriate data structures in Python, optimizing data organization and manipulation for various computational tasks.
CO4	Manage files and handling exceptions in Python, ensuring efficient data storage and robust error handling in their programs.
CO5	Effectively manage and analyses data for informed decision-making and reporting

(Note- Faculty can add the more CO's as per their subject.)

SECTION-A

Attempt all parts of the following: (Short Answer Type Questions, do not exceed 200 words)

Q.1	Marks	CO
(A)	4	CO - 1
(B)	4	CO - 1
(C)	4	CO - 1
(D)	4	CO - 3
(E)	4	CO - 2

SECTION-B

Attempt all questions out of the following: (Long Answer Type Questions)

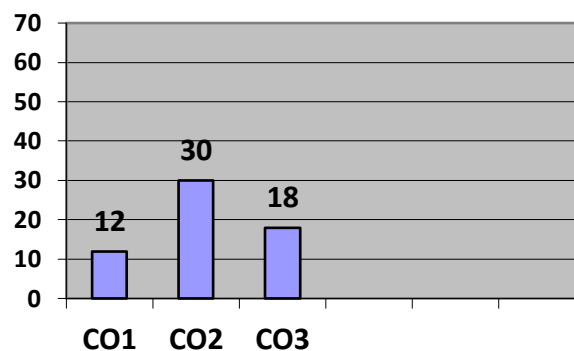

Q. No	Marks	CO
2 (A)	6	CO – 2
2 (A)	6	CO – 2
2 (B)	6	CO – 2
2 (B)	6	CO – 2
3 (A)	6	CO – 2
3 (A)	6	CO – 2
3 (B)	6	CO – 3
3 (B)	6	CO – 2

SECTION-C

Attempt all parts of the following: (Caselet / Numerical)

	Marks	CO
4.A	8	CO – 2
4.B	8	CO - 3

■ Course Outcome Wise Marks Distribution

GNIOT Institute of Management Studies – PGDM (Batch 2023-25)

(TRIMESTER – II) END TERM EXAMINATION, JANUARY - 2024

Basic Python for Managers

[Time: 3 Hours]

[Maximum Marks: 60]

INSTRUCTIONS:

- (i) There are **THREE** sections in this question paper.
- (ii) Attempt questions from each section as per the directions.
- (iii) Make suitable assumptions wherever necessary.

SECTION-A

(Short Answer Type Questions, do not exceed 200 words)

Q.1. Attempt all parts of the following:

(5×4=20)

- a) How is Python an interpreted language?
- b) How do you write comments in python?
- c) Write a program to iterate both lists simultaneously and display items from list1 in original order and items from list2 in reverse order.
- d) Display numbers from -10 to -1 using for loop
- e) What is the difference between 'extend ()' and 'append ()' methods for lists?

SECTION-B

(Long Answer Type Questions)

Q.2. Attempt all questions of the following

(4×6=24)

- (a) How do you sort a list in reverse order using python? Write a python program.

OR

- (a) What is a dictionary in Python? Explain with example.

- (b) What is the output of the following display_person () function call

```
def display_person(*args):  
    for i in args:  
        print(i)  
display_person (name="john", age="90")
```

OR

- (b) How to use range () function in Python.

Q.3. (a) How do you differentiate between a tuple and a list?

OR

- (a) What is the output of the following dictionary operation

```
dict1 = {"name": "john", "salary": 70000}  
temp = dict1.pop("age")  
print(temp)
```

- (b) Difference between Break, Continue and Pass Statement.

OR

- (b) Given a Python list, write a program to remove all occurrences of item 40.

```
List = [5, 40, 15, 40, 25, 50, 40, 78, 40]
```

SECTION-C

Let's consider a scenario where you need to manage a list of students and their exam scores.

Q.4. Attempt all parts of the following:

(2×8=16)

- 4(a) How you will use tuples to represent each student's information (name and score), a list to organize this data for multiple students.
- 4(b) Create function to calculate the average score of all students.
