

[Time: 3 Hours]

[Maximum Marks: 60]

Following are the course outcomes of the subject: - SUBJECT NAME

CO	Course Outcome (CO)
CO1	
CO2	
CO3	

(Note- Faculty can add the more CO's as per their subject.)

SECTION-A

Attempt all parts of the following: (Short Answer Type Questions, do not exceed 200 words)

Q.1	Marks	CO
(A)	4	CO - 1
(B)	4	CO - 1
(C)	4	CO - 1
(D)	4	CO - 1
(E)	4	CO - 3

SECTION-B

Attempt all questions out of the following: (Long Answer Type Questions)

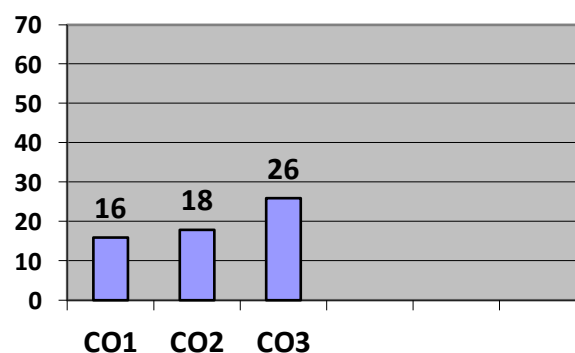

Q. No	Marks	CO
2 (A)	6	CO2
2 (A)		
2 (B)	6	CO-2
2 (B)		
3 (A)	6	CO-2
3 (A)		
3 (B)	6	CO – 3
3 (B)		

SECTION-C

Attempt all parts of the following: (Caselet / Numerical)

Q.4	Marks	CO
4 (A)	8	CO – 3
4 (B)	8	CO - 3

Course Outcome Wise Marks Distribution

GNIOT Institute of Management Studies – PGDM (Batch 2023-25)

(TRIMESTER – III) END TERM EXAMINATION, APRIL - 2024

Analytics for Managers using Python

[Time: 3 Hours]

[Maximum Marks: 60]

INSTRUCTIONS:

- (i) There are THREE sections in this question paper.**
- (ii) Attempt questions from each section as per the directions.**
- (iii) Make suitable assumptions wherever necessary.**

SECTION-A

(Short Answer Type Questions, do not exceed 200 words)

Q.1. Attempt all parts of the following:

You've been provided with a dataset named "student_performance.csv" containing information about students' performance in various subjects. Perform following task on this dataset using Python in a Jupyter notebook/google colab.
(5×4=20)

- a) How do you import the panda's library in a Jupyter notebook?
- b) What function is used to read a CSV file into a DataFrame in pandas?
- c) How do you display the first five rows of a DataFrame?
- d) What method is used to check for missing values in a DataFrame?
- e) What function is used to plot a histogram in matplotlib?

SECTION-B

(Long Answer Type Questions)

Q.2. Attempt all questions of the following

(4×6=24)

You are provided with a dataset named "customer_data.csv" containing information about customers of an e-commerce company. The dataset includes features such as customer ID, age, gender, annual income, and spending score.

- (a) Load the dataset into a DataFrame named customer_df

OR

- (a) Perform exploratory data analysis (EDA) to understand the structure and characteristics of the dataset.
- (b) Clean the dataset by handling missing values and any other inconsistencies.

OR

- (b) Explore the distribution of numerical variables (e.g., age, annual income) using summary statistics and visualizations.

Q.3. You are provided with a dataset named "housing_prices.csv" containing information about housing properties, including features such as area, number of bedrooms, number of bathrooms, location, and sale price.

- (a) Load the dataset into a DataFrame named housing_df and Perform exploratory data analysis (EDA) to understand the structure and characteristics of the dataset.

OR

- (a) Clean the dataset by handling missing values, outliers, and any other inconsistencies.

- (b) Explore the distribution of numerical variables (e.g., area, sale price) using summary statistics and visualizations.

OR

- (b) Analyse the relationships between variables (e.g., area vs. sale price, number of bedrooms vs. sale price) using appropriate visualizations (e.g., scatter plots, correlation matrices).

SECTION-C

A Manufacturing company has their Stock Balance of Raw Materials & as a system had a glitch, they were trying to Issue Raw Material (Stock Outward entry) but system was not capturing it, they tried entering qty 3 times but system was not showing the issued qty.

Later on it was found that system had captured those entries in actual and now it has being shown in Stock Balance, so now the Inventory Balance Report is inaccurate because in a single day in that business, they issue a unique raw material only once in a day & does not have multiple entries, now as they tried 3 times there are 2 duplicate entries!

Q.4. Attempt all parts of the following:

(2×8=16)

- 4(a)** What was the initial issue faced by the manufacturing company regarding the stock balance of raw materials?
- 4(b)** How did the system glitch impact the inventory management process?
