

GNIOT Institute of Management Studies – PGDM (Batch 2023-25)**(TRIMESTER –III) END TERM EXAMINATION, APRIL -2024**

International Logistics and Shipping Operations

[Time: 3 Hours]**[Maximum Marks: 60]****Following are the course outcomes of the subject: - International Logistics and Shipping Operations**

CO	Course Outcome (CO)
CO1	To help students understand the issues in International Logistics.
CO2	To provide an understanding of Sales Contract in International Logistics.
CO3	To understand the international logistics and transportation system.

*(Note- Faculty can add the more CO's as per their subject.)***SECTION-A****Attempt all parts of the following: (Short Answer Type Questions, do not exceed 200 words)**

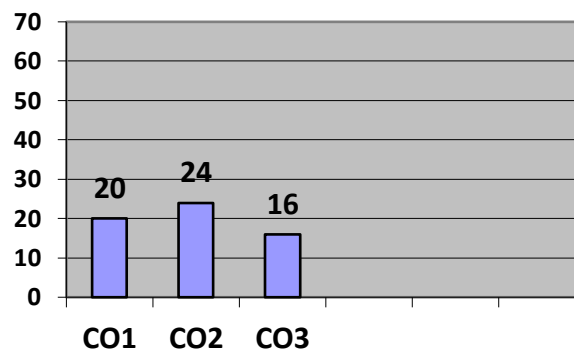

Q.1	Marks	CO
(A)	4	CO - 1
(B)	4	CO - 3
(C)	4	CO - 1
(D)	4	CO - 2
(E)	4	CO - 1

SECTION-B**Attempt all questions out of the following: (Long Answer Type Questions)**

Q. No	Marks	CO
2 (A)	6	CO – 1
2 (A)	6	CO – 3
2 (B)	6	CO – 2
2 (B)	6	CO – 2
3 (A)	6	CO – 1
3 (A)	6	CO – 1
3 (B)	6	CO – 3
3 (B)	6	CO – 3

SECTION-C**Attempt all parts of the following: (Caselet / Numerical)**

Q.4	Marks	CO
4 (A)	8	CO – 1
4 (B)	8	CO - 2

(TRIMESTER – III) END TERM EXAMINATION, APRIL - 2024

International Logistics and Shipping Operations

[Time: 3 Hours]

[Maximum Marks: 60]

INSTRUCTIONS:

- (i) There are **THREE** sections in this question paper.
- (ii) Attempt questions from each section as per the directions.
- (iii) Make suitable assumptions wherever necessary.

SECTION-A

(Short Answer Type Questions, do not exceed 200 words)

Q.1. Attempt all parts of the following:

(5×4=20)

- (a) Explain the third party and fourth party logistics with reference to international logistics.
- (b) Explain the difference between domestic and international logistics with the help of examples
- (c) Explain various incoterms with the special reference to international logistics
- (d) “Supply chain is nothing but managing the information flow in an organization.” Criticize or defend this statement.
- (e) Discuss various role of packaging and insurance in case of international logistics.

SECTION-B

(Long Answer Type Questions)

Q.2. Attempt all questions of the following

(4×6=24)

- (a) Cutting edge Information technology is the cause of competitive supply chain management of the companies like Wal-Mart and Unites parcel services. How do you think development in IT has led to the development and advancement of supply chain management system?

OR

- (a) What are the various modes of transports in Supply Chain? Explain when each mode of transport is suitable to export agricultural product in other country.
- (b) What is importance of transportation in Supply Chain? What are the factors affecting the transportation decision? Explain with a real-life example.

OR

- (b) What are the various components of Export Sales Contract in International Logistics.

Q.3. (a) Why is it important for a company to achieve strategic fit between its supply chain strategy and its competitive strategy? Identify the major drivers of supply chain performance and discuss the role of each driver in creating strategic fit between the supply chain strategy and the competitive strategy.

OR

- (a) Discuss the role of demand forecasting in SCM. Also discuss some qualitative and quantitative method of demand forecasting with reference to international logistics.
- (b) As a supply chain manager of a retail house what are the various factors do you think influence your decision on a network design. What would be the kind of framework you would follow in order to make this decision?

OR

- (b) What are the risks that unexpected events pose to this supply chain? Suggest measures, trade-offs and risk management technique which can be considered in handling risks and obstacles so as to make the supply chain more robust in case of internal logistics.

SECTION-C

Q.4. Attempt all parts of the following:

(2×8=16)

4(a) Ace Dairies gives a home delivery services for milk, dairy products and a range of related goods. Roger Smnitheram has run the dairy for the past twelve years. His product is a combination of goods (the items he delivers) and services (the delivery and associated jobs he does for customer). At the heart of operations is information systems which contain full details of all Roger's 500 customers including their regular orders, special orders, where to deliver, how they pay and so on. Every day the system calculates the likely sales of all products in two days time. Roger adds some margin of safety allows for likely variations and passes his order to Unigate Dairy in Totnes in Devon (about 150 km away). This Unigate depot acts as a wholesaler for milkmen in Wales and the southwest of England. The following evening it delivers to a holding depot in Camborne and then takes Roger's goods 10 km to a cold store in Hayle. At 5.30 the following morning Roger collects the order from his cold store and starts delivery to customer. This normally takes until 1.30 in the afternoon, but on Friday he spends more time collecting money and often finishes after 5.00 pm.

There are several specific problems facing Ace Dairies. There is; for example some variation in daily demand so Roger has to carry spare stock. He cannot carry too much as dairy products have a short life and anything not delivered quickly is thrown away. Roger aims at keeping this waste down to 2 percent of sales. There are also problems maintaining a service during holidays or when Unigate has difficulties with their deliveries. Perhaps Rogers' main concern is maintaining his sales over the long term. Demand for doorstep deliveries is declining as people buy more milk at supermarkets.

The number of milkmen in Hayle has declined from ten in 1987 to three in 2002. Most of Roger's customers have been with him for many years, but he generates new customers by canvassing, delivering leaflets, special offers, carrying a range of other product and so on.

(i) Describe the supply chain for milk

(ii) Where does Ace Dairies fit into this? What specific activities from the logistics in Ace Dairies?

4(b) Case Study: Making of Tata Indica

TELCO India (TATA Motors) was a truck maker and forayed into manufacturing of small car, "Indica" in the year 1995. When it made its entry, Telco decided to purchase some parts required for manufacturing small cars from across the world. It outsourced certain parts, such as cylindrical gaskets, belts and metal sheets. In addition, it focused on developing some parts using its in-house expertise. One of the challenges faced by Telco was in implementing the supply chain.

Telco took all the possible steps to enable an effective supply chain system. The supply chain focused on making available raw materials and resources, local warehouses and service centres, strong transportation facilities, supplier channels and vendor base and ensuring timely delivery of goods. The local warehouses aided Telco in delivering product to vendors located at distant places. Telco made joint ventures with the manufacturers and the transporters for improvising its supply chain. This reduced the logistics cost considerably and Telco could meet the customers' demands without any delay. Thus, Telco's implementation of supply chain reduced the inventory expenses without compromising the quality and delivery time of the goods, thus making Telco's venture in small car manufacturing a great success.

Ask the participants to read the passage carefully and prepare a report on the success story of implementation of supply chain management system at Telco in regard to its small car, Indica.

Provide hints on the key points that the learners should elaborate:

- The Outsourcing Strategy
- Vendor Development
- Supply Chain
- Leveraging the Supply Chain

(a) Analyse the above case study

(b) What is the problem in case study and discuss some remedial solution
