(TRIMESTER – IV) END TERM EXAMINATION, OCTOBER - 2024

DATA ANALYSIS USING POWER BI

[Time: 2 Hours]

[Maximum Marks: 60]

INSTRUCTIONS:

- (i) There are **THREE** sections in this question paper.
- (ii) Attempt questions from each section as per the directions.
- (iii) Make suitable assumptions wherever necessary.

SECTION-A

(Short Answer Type Questions, do not exceed 200 words)

Q.1. Attempt all parts of the following:

(5×4=20)

- a) What is Power BI, and what are its main components?
- b) Explain the difference between Power BI Desktop and Power BI Service.
- c) What is Power Query, and how is it used in Power BI?
- d) Define DAX and its significance in Power BI.
- e) Describe how to import data from an Excel file into Power BI.

SECTION-B

(Long Answer Type Questions)

Q.2. Attempt all questions of the following

(2×10=20)

(a) Define Power BI and its primary purpose. Give suitable examples on usage.

OR

(b) List the components of Power BI. Briefly describe the main components.

Q.3. (a) What is Power Query, and what functions does it serve?

OR

(b) Explain in detail methods for importing data in PowerBI.

SECTION-C

Sales Performance Analysis

Scenario: You are a data analyst at a retail company. Your manager has asked you to create a Power BI report to analyze sales performance over the last year. You have access to sales data that includes fields such as Date, Region, Product, Sales Amount, and Customer Feedback.

Q.4. Attempt all parts of the following:

(2×10=20)

- 4(a)** Describe how you would connect to the sales data in Power BI. What data source types can you use, and how would you ensure the data is up-to-date? Explain the steps you would take in Power Query to clean and prepare the sales data for analysis. What specific transformations might you apply, and why?
- 4(b)** Briefly outline the key elements you would include in your Power BI dashboard to ensure it effectively communicates sales insights to your manager. What design principles would you follow? Identify three different types of visualizations you would create to represent the sales data. For each visualization, explain why it is appropriate for conveying insights about sales performance.
