- (ii) Attempt questions from each section as per the directions.
- (iii) Make suitable assumptions wherever necessary.

SECTION-A

(Short Answer Type Questions, do not exceed 200 words)

Q.1. Attempt all parts of the following:

(5×4=20)

- (a) Explain the importance of HR Analytics in strategic HR decision making.
- (b) How can data driven approach in HR give a sustainable competitive advantage to an organization.
- (c) Performance Appraisal is one of the crucial functions of the HR department and must be done in alignment with present data records. Comment on it.
- (d) Define Predictive Analytics.
- (e) Bring out the typical applications of HR analytics.

SECTION-B

(Long Answer Type Questions)

Q.2. Attempt all questions of the following

(2X10=20)

- (a) HR Analytics has changed the role of HR managers in the present era. What factors must organizations keep in mind while hiring HR managers these days?

OR

- (b) Provide in detail the roles and responsibilities of an HR Analyst.

Q.3. (a) Explain the application of HR analytics Framework in an organization.

OR

- (b) Discuss analytical capabilities and analytical value chain.

SECTION-C

Alpha Tech is a leading technology firm with over 5,000 employees worldwide. Recently, the company has faced challenges in attracting and retaining top talent, particularly in the fields of software development, data science, and cybersecurity. To address these challenges, the company has started leveraging HR analytics to gain insights into their talent acquisition process and employee retention.

1. Time to Hire: The average time it takes to fill an open position.
 2. Cost per Hire: The total recruitment cost divided by the number of hires made.
 3. Employee Turnover Rate: The percentage of employees leaving the company each year.
 4. Offer Acceptance Rate: The percentage of job offers accepted by candidates.
 5. Candidate Sources Data on the success of different hiring sources (job boards, employee referrals, recruitment agencies, etc.).
- The team has been analysing this data to identify bottlenecks and optimize the recruitment process. They have discovered that the time to hire for technical positions is significantly longer than the industry average, and the offer acceptance rate has dropped by 15% in the last two years. Moreover, there is a high turnover rate among employees who have been with the company for less than two years, indicating a problem with retaining new hires.

Q.4. Attempt all parts of the following:

(2×10=20)

- 4(a)** Based on the provided case, how would you leverage HR analytics to reduce the "time to hire" for technical positions? Discuss the key metrics you would analyse and the strategies you would recommend to improve the recruitment process

- 4(b)** How would you use data analytics to investigate the root causes of these problems?
