

GNIOT Institute of Management Studies – PGDM (Batch 2023-25)**(TRIMESTER –IV) END TERM EXAMINATION, OCTOBER -2024****INVENTORY & WAREHOUSING MANAGEMENT****[Time: 2 Hours]****[Maximum Marks: 60]****Following are the course outcomes of the subject:- INVENTORY & WAREHOUSING MANAGEMENT**

CO	Course Outcome (CO)
CO1	To understand the basic concepts and various functions of Warehouse
CO2	To impart knowledge on various types of warehouses and their advantages.
CO3	To study the identification of various materials and material storage systems, material handling equipment
CO4	To impart knowledge on inventory management and focusing towards classification of various types of inventories.

(Note- Faculty can add the more CO's as per their subject.)**SECTION-A****Attempt all parts of the following: (Short Answer Type Questions, do not exceed 150- 200 words)**

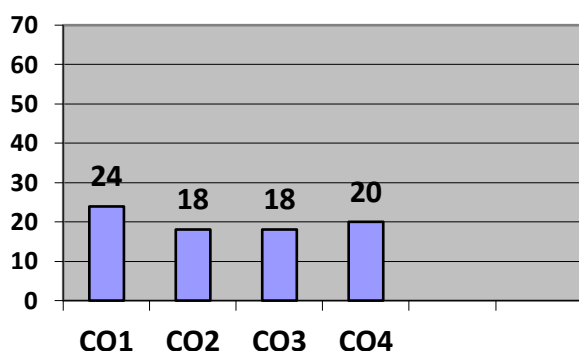

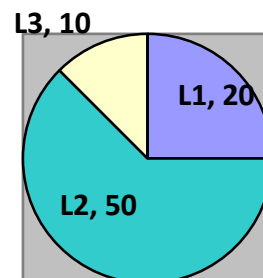

Q.1	Marks	COURSE OUTCOME	BLOOMS LEVEL
(A)	4	CO – 1	BL-1
(B)	4	CO – 2	BL-1
(C)	4	CO – 2	BL-1
(D)	4	CO – 3	BL-1
(E)	4	CO – 3	BL-1

SECTION-B**Attempt ANY TWO questions out of the following: (Long Answer Type Questions, do not exceed 300- 400 words)**

Q. No	Marks	COURSE OUTCOME	BLOOMS LEVEL
2 (A)	10	CO – 1	BL-2
2 (B)	10	CO – 1	BL-2
3 (A)	10	CO – 4	BL-2
3 (B)	10	CO – 4	BL-2

SECTION-C**Attempt all parts of the following: (Caselet / Numerical, do not exceed 300- 400 words)**

Q.4	Marks	COURSE OUTCOME	BLOOMS LEVEL
4 (A)	10	CO – 2	BL-2
4 (B)	10	CO – 3	BL-3

Course Outcome Wise Marks Distribution**L1 L2 L3****Bloom's Level wise Marks Distribution**

(TRIMESTER – IV) END TERM EXAMINATION, OCTOBER - 2024

INVENTORY & WAREHOUSING MANAGEMENT

[Time: 2 Hours]

[Maximum Marks: 60]

INSTRUCTIONS:

- (i) **There are THREE sections in this question paper.**
- (ii) **Attempt questions from each section as per the directions.**
- (iii) **Make suitable assumptions wherever necessary.**

SECTION-A

(Short Answer Type Questions, do not exceed 200 words)

Q.1. Attempt all parts of the following:

(5×4=20)

- (a) List the importance of inbound logistics and outbound logistics in the storing function of warehousing.
- (b) Differentiate between private and public warehouses.
- (c) Define and explain the importance of measures and metrics in warehouse operations.
- (d) Summarise the role of warehouse documentation and record keeping in effective warehouse management.
- (e) Describe the purpose of safety stock and reorder level in inventory management.

SECTION-B

(Long Answer Type Questions)

Attempt all questions of the following

(2X10=20)

Q.2. (a) Compare and contrast the features and benefits of own warehouses versus hired warehouses.

OR

(b) Discuss the role of material classifications in warehouse operations and how effectively it contributes to overall efficiency.

Q.3. (a) Discuss the information flows within a warehouse and how they are managed through ERP and WMS systems.

OR

(b) Discuss the implications of carrying inadequate inventory versus holding excessive inventory, including associated costs and operational impacts.

SECTION-C

Break Bulk Consolidation & Packaging – Inventory & Warehousing Perspective

Atlanta, known as “Supply Chain City,” offers businesses significant supply chain efficiencies. One such strategy is break bulk consolidation, ideal for companies managing products manufactured in different locations. In this process, products from various manufacturers are received, combined, and repackaged as a single product for the end user, reducing time to market and transportation costs.

In the case of a tractor company, components like loaders, mower decks and snow blowers were manufactured overseas. Instead of consolidating and packaging these parts at each manufacturing location, break bulk consolidation allowed each component to be shipped directly to a regional North American warehouse. There, these items were repackaged into kits for further distribution. This approach eliminated unnecessary warehousing at multiple sites and reduced transit time, ensuring inventory management was more efficient. By streamlining operations through a single facility that focused solely on packaging rather than long-term storage, the company reduced holding costs and optimized supply chain performance.

This method not only streamlined the distribution process but also allowed the company to manage inventory levels more effectively. By consolidating the parts in one location, the company could better forecast demand and adjust procurement strategies based on real-time data. This resulted in more accurate inventory tracking, reduced risk of stock-outs or overstock situations, and improved overall supply chain responsiveness.

Q.4. Attempt all parts of the following:

(2×10=20)

4(a) Discuss how break bulk consolidation can impact inventory management and reduce overall warehousing costs for a company dealing with multiple components from different manufacturers. Summarise the potential risks and benefits.

4(b) If you were managing the warehouse in this case, how would you plan to set up your processes to ensure efficient handling, packaging, and timely distribution of goods while minimizing holding costs? Identify key metrics you would track.
