SECTION-C

Ananya, a young entrepreneur, noticed during the COVID-19 pandemic that small farmers in her region were struggling to sell their produce due to broken supply chains and limited access to digital tools. She created *AgriLink*, a mobile app that connects farmers directly with urban consumers. The app enables customers to browse, order, and track fresh produce, while giving farmers a broader market and better margins. *AgriLink* operates on a commission-based model and collaborates with local delivery agents. While user interest is high, Ananya is now facing operational hurdles such as erratic supply, low digital literacy among farmers, and slow deliveries. As she prepares for scaling the platform to other regions, she is worried about sustainability, financial planning, and crafting a pitch to attract investors.

Q.4. Attempt all parts of the following:

(2×10=20)

4(a) Identify how Ananya can assess Agri Link’s market feasibility in other regions.

4(b) Suggest two improvements she can make to increase investor confidence.
