

GNIOT Institute of Management Studies – PGDM (Batch 2024-26)**(TRIMESTER -III) END TERM EXAMINATION, MAY -2025****STRATEGIC SUPPLY CHAIN MANAGEMENT****[Time: 2 Hours]****[Maximum Marks: 60]****Following are the course outcomes of the subject: - STRATEGIC SUPPLY CHAIN MANAGEMENT**

CO	Course Outcome (CO)
CO1	Understand the basic concepts of supply chain Management and establish the impact of supply chain decisions on a firm's performance.
CO2	Identify and describe the relationship between supply chain strategy and competitive strategy of a firm
CO3	Identify the major drivers of supply chain performance & understand the role of each driver in creating strategic fit

*(Note- Faculty can add the more CO's as per their subject.)***SECTION-A****Attempt all parts of the following: (Short Answer Type Questions, do not exceed 150- 200 words)**

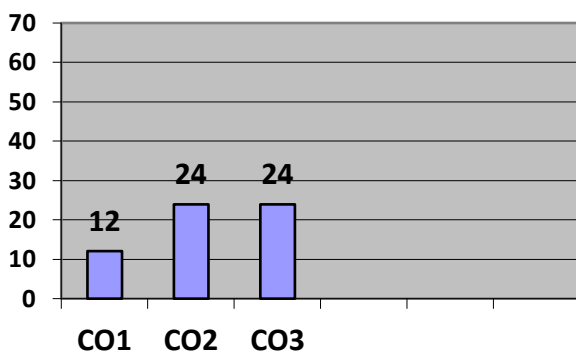

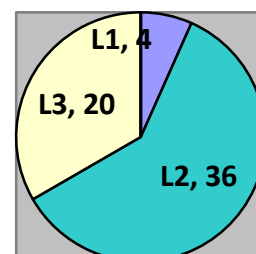

Q.1	Marks	COURSE OUTCOME	BLOOMS LEVEL
(A)	4	CO – 1	BL-2
(B)	4	CO – 1	BL-2
(C)	4	CO – 1	BL-1
(D)	4	CO – 3	BL-2
(E)	4	CO – 2	BL-2

SECTION-B**Attempt ANY TWO questions out of the following: (Long Answer Type Questions, do not exceed 300- 400 words)**

Q. No	Marks	COURSE OUTCOME	BLOOMS LEVEL
2 (A)	10	CO – 3	BL-2
2 (B)	10	CO – 3	BL-2
3 (A)	10	CO – 2	BL-2
3 (B)	10	CO – 2	BL-2

SECTION-C**Attempt all parts of the following: (Caselet / Numerical, do not exceed 300- 400 words)**

Q.4	Marks	COURSE OUTCOME	BLOOMS LEVEL
4 (A)	10	CO – 2	BL-3
4 (B)	10	CO - 3	BL-3

Course Outcome Wise Marks Distribution**L1 L2 L3****Bloom's Level wise Marks Distribution**

(TRIMESTER –III) END TERM EXAMINATION, MAY - 2025

STRATEGIC SUPPLY CHAIN MANAGEMENT

[Time: 2 Hours]

[Maximum Marks: 60]

INSTRUCTIONS:

- (i) There are **THREE** sections in this question paper.
- (ii) Attempt questions from each section as per the directions.
- (iii) Make suitable assumptions wherever necessary.

SECTION-A

(Short Answer Type Questions, do not exceed 200 words)

Q.1. Attempt all parts of the following:

(5×4=20)

- (a) Explain the Cycle View of a Supply Chain. Describe the different cycles involved and the interactions between the supply chain participants in each cycle.
- (b) Explain the key features of Toyota's supply chain management and how they contribute to its success in the automotive industry.
- (c) Describe the key flows in supply chain management. Explain the significance of each flow.
- (d) Explain different modes of transportation used in supply chain.
- (e) Explain the Make or Buy Decision in supply chain management. What are the key factors a company should evaluate when deciding whether to manufacture a product in-house or outsource it?

SECTION-B

(Long Answer Type Questions)

Q.2. Attempt all questions of the following

(2X10=20)

- (a) Explain the importance of inventory as a SCM driver. How does it impact and industry? give examples.

OR

- (b) Explain how facilities act as a driver of supply chain performance. Discuss the trade-off between efficiency and effectiveness in facility decisions, using examples to illustrate centralized vs decentralized facilities and their impact on responsiveness and cost.

Q.3. (a) Explain the various design options available for a transportation network in a supply chain. Discuss the key characteristics, advantages, and limitations of each option

OR

- (b) Compare and contrast the characteristics of an efficient supply chain and a responsive supply chain. Discuss in what types of industries or product scenarios would each be most appropriate.

SECTION-C

Q.4. Attempt all parts of the following:

(2×10=20)

4(a) ABC Enterprises is a growing manufacturing company that is exploring different supply chain strategies for its diversified product lines. The company manufactures standard household items, customizable furniture, computer systems, and heavy-duty industrial machinery based on customer requirements. The management wants to optimize production and delivery processes for the following product categories:

1. Standard household items (kitchen appliances)
2. Customizable furniture (modular wardrobes)
3. Computer systems (build-your-own desktops)
4. Heavy-duty industrial machinery (specialized turbines designed from scratch)

1. Identify and classify each product category of ABC Enterprises under the appropriate supply chain model (MTS, BTO, ATO, ETO).
2. For each model, describe the key characteristics that make it suitable for the respective product category.
3. Identify the advantages and challenges ABC Enterprises might face with each approach.

4(b) Bosch Ltd. India, a leading manufacturer of automotive components, is reviewing its supply chain strategy to optimize inventory costs for one of its high-demand products—brake pads.

The annual demand for brake pads is 12,000 units. Each time Bosch places an order with its supplier, it incurs a fixed ordering cost of ₹800. The carrying cost per unit per year is ₹40. Bosch operates 300 days a year, and the lead time from supplier to plant is consistently 5 days.

- i) Identify which supply chain drivers (logistical and cross-functional) are being impacted in this case and explain their relevance.
- ii) Using the Economic Order Quantity (EOQ) model, calculate: EOQ, Total ordering cost and Total carrying cost
- iii) Suggest two supply chain strategies Bosch could adopt to reduce inventory-related costs without affecting production schedules.
